

LIVE YOUR DREAM

Winter 2017-2018

 **GARNEAU**[®]

Live your dream

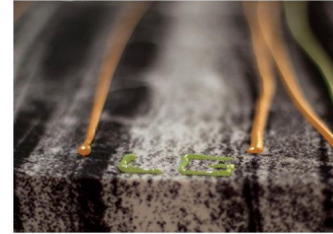

Dreams do not hibernate. They live within us all year long despite the bitter cold. Dreams are kept awake by our habitual desire to explore natural landscapes year round. Some of us train for the race season. For others, this IS our race season, and for all of us, winter is just the background in our continued quest for getting outside. So get out there and live your dream.

My dream is...

Dreams are the foundation of everything we do. I've lived my cycling dreams, I continue to live my entrepreneur dream, and now, I am living my artist dream. Now more than ever, art is the basis of everything I create.

The artistic direction of my company is art itself. Everything our team creates is functional, technical and artistic!

Art is also a way to give back to the community. That is the raison d'être of the Art Factory. My goal is to help future artists and young athletes around the world through the sale of my paintings.

If you've ever ordered a custom kit, you realize that art is huge part of the process. But what if art could fund an entire race team? Sound ludicrous? It's actually happening. As an art graduate, I will use my paintings to fund the 2017 Garneau-Quebecor Race Team. Paintings are being sold already! It's a passion that fuels another. And well, it fuels a team.

"This award speaks to the significance of product development at Garneau. We are proud to collaborate with such an innovative fabric technology partner as Polartec®. We share a passion to design products that improve our enjoyment of the outdoor sports we love."

Katy Bond Director of Apparel at Garneau

We Win!

The Polartec® Apex Award-winning styles, the Cove Hybrid Jacket and the Rocket Skirt, reflect the development and collaboration of a full complement of female outdoor enthusiasts and designers. Together, these talented and passionate women truly design and develop to the specific needs of women athletes with a nod towards design styles and colors that appeal to the empowered woman.

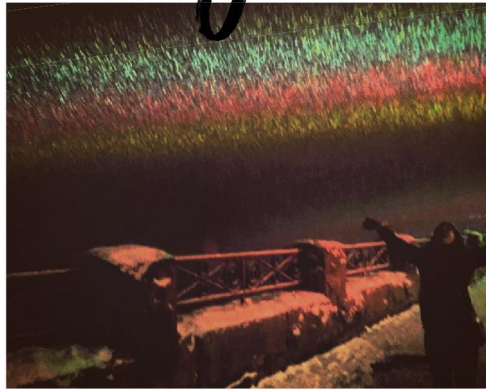

"We put a lot of effort into developing the world's most advanced fabrics. It is a real honor to celebrate the creativity and technical prowess applied by our partners in these 2016 APEX Award winners."

Gary Smith Polartec® CEO

Cross-country ski

Garneau ambassador Lise Munsie is passionate about every endurance sport there is. Whether it's cycling, running or multisport events of all kinds, she doesn't like to rest and winter is not an exception. Cross-country skiing is Lise's most recent winter sport and she got serious about it last winter.

While she lives and trains mostly in the urban area of Toronto, it's places like British Columbia and the highest mountains of Europe that occupy her wildest sports dreams. Last year, Lise took part in the Canadian Ski Marathon, a two-day event that takes place on the famous trails of the Gatineau Park. This is where the country's best skiers compete over 160 km of cross-country ski trails. That's quite a great start for a first winter skiing!

Lise believes that bad weather doesn't exist when you have great clothes. She can go far as far as she wants and ski for as long as she wants with a great wind-blocking jacket that breathes well. She also makes sure to keep her hands and feet warm with boots and gloves, and she's all set to go. Take a look at Lise Munsie's 5 favorites Garneau Nordic products to enjoy cross-country skiing while training for one of the toughest ski events in North America.

Winter multisports

Brian Summers love doing sports for the experiences he lives through it. This Garneau Ambassador has been an avid cycling explorer forever, but also a winter adventurer who is always looking for new places to discover.

As an alpine skier, he explored some of the most gorgeous summits of the Alps and the Rockies. Now that his kids are grown up, he likes to enjoy the outdoors with them. Whether it's snowshoeing with the family, practicing his cross-country skiing technique with his wife or getting a taste of winter fatbiking, Brian just likes to get the most out of every winter day.

He chooses his clothes to be as versatile as possible to be able to use them in his many different activities. For him, wearing clothes with a slightly roomier fit that allows him to add more layers is the key to being comfortable in the cold. Here are Brian Summers' 5 favorite Garneau products to enjoy the freedom and multiple possibilities that winter offers.

Winter MTB

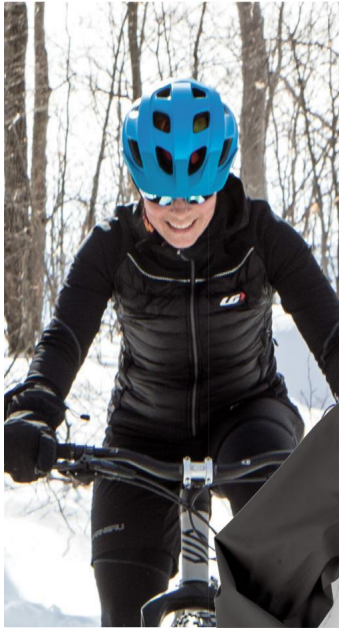

Canadian winter are harsh, but they come with a major benefit: plenty of snow, making them an ideal playground for those who want to enjoy the cold season. Marijulie knows how to fully enjoy winter on her fatbike. Whether it's in the Laurentides region, at Mont-Sainte-Anne or south of the border in Vermont, every year she sets out to explore new winter wonderlands.

As Garneau's winter apparel product manager, Marijulie uses each snow ride to test the winter MTB collection in every imaginable condition. She admits being sensitive to the cold, so she prefers keeping nice and warm by wearing insulated clothes that easily evacuate moisture. She's got everything she needs to head out in search of unique paths that only exist a few months per year!

Here are Marijulie's 6 favorite products for riding on snow, versatile items in any snow condition and temperature.

After sports

Winter is a magical part of the four-seasons cycle. When the Earth's axis has the Northern hemisphere tilted away from the Sun, temperatures drop drastically and bring us a wonderland of snow and frost. In our hemisphere, we get to appreciate winter by dressing properly and enjoying outdoor activities.

The Transition collection features sporty jackets that combine fabric and insulation to provide warmth. They are filled with SOLARball®, a synthetic down-like loft that is quick-drying, hypoallergenic, easy to care for and compressible. Its exothermic reaction absorbs heat generated by the sun, making it warmer longer than the comparable duck down. The inner layer of Mega Heat RX™ is a reflective lining that uses body heat to generate warmth.

Enjoy the snug feeling of a down-like fill, mix it with our line of accessories and keep warm on your daily transit or to relax after a long day on the slopes.

Course Nordic Jacket

Here is the ultimate tool for skiing at high intensity in cold winter temperatures. The Course Nordic is a state-of-the-art cross-country skiing garment made of Polartec® Power Shield Pro®, a softshell that blocks 99% of the wind and breathes 30% to 50% more in dynamic conditions. The jacket's back and armpits provide maximum ventilation to evacuate moisture generated by your efforts. The Course Nordic is also a great wind-breaker that withstands the rigors of winter. Whether you're cross-country skiing, running, snowshoeing or even for your coldest winter bike rides, this high-end jacket offers unparalleled comfort. Its colors work well with a number of performance tights as well as with a wide range of accessories from our collection. Style and high performance combine perfectly to offer you this superb jacket that will come in very handy for winters to come.

1. Polartec® Power Shield® Pro: 4-way stretch windproof and breathable DWR softshell
2. Vertex: 4-way stretch opaque construction light knit with brushed back
3. Polartec® Highlander Mesh: Four-way stretchable mesh with excellent moisture management that allows quick drying and great comfort
4. Drytex® soft collar top: Enhances comfort during activities
5. Full-length zip with reflective accents, inner flap and garage
6. Pockets located higher to allow access while wearing a belt bag or any backpack
7. Multimedia chest pocket with zip
8. 1 cargo rear pocket with reflective trim on flap: Allows easy access with gloves
9. Stretchable cuffs
10. Hem with elasticized drawstring hidden inside pockets

Cove Hybrid Jacket

The Cove is an ideal choice for your snowshoe outings or everyday activities. It will keep you warm when you want to stroll around and enjoy the scenery, while preventing you from overheating when you tackle the steepest climbs on your path. What's more, not so long ago, clever were those who were able to dress for fatbiking and manage to be comfortable before, during and after their ride. This year, the Cove hybrid jacket is back and it's perfectly adapted for the needs of this increasingly popular sport that takes place in very low temperatures and often at high intensity. That is why the back of the jacket evacuates sweat while retaining body heat, thanks to supple fabrics that facilitate body movements when you're riding on a snowy path through the trees.

1. FreeFlow: Ultra light, wind-breaking, breathable
2. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
3. HeatMaxx: 4-way stretch opaque construction knit with brushed back
4. Drytex® soft collar top: Enhances comfort during activities
5. Full-length zip with reflective accents, inner flap and garage
6. Pockets located higher to allow access while wearing a belt bag or any backpack
7. 1 mesh inner pocket: Additional storage keeps your electronic device warm
8. Thumb loop at cuff

Enertec Jacket

Merge the ultra-breathability of a 2-ply bonded softshell with just the right amount of technical features and adopt the Enertec jacket as a favorite for your winter adventures and training sessions. Keep your core warm while moisture evacuates through the back thanks to a highly ventilated brushed fabric. The numerous front pockets, high enough to wear a waist pack, combined to a large back pocket are convenient to secure all your gear. This well-thought style works like a champ for cross-country skiing, snowshoeing, and for all your cold-weather activities.

1. Enertec: 2-way stretch windproof DWR, breathable and abrasion-resistant 2-ply bonded softshell with brushed back
2. Vertexx: 4-way stretch opaque construction light knit with brushed back
3. Drytex® soft collar top: Enhances comfort during activities
4. Full-length zip with inner flap and garage

Alpha Vest

When cold winds blow strong, riding or skiing becomes much less pleasant. The Alpha vest is a high performance insulating windbreaker that helps you start your training sessions without having to push to the max to warm up quickly. The front blocks the wind while the back evacuates perspiration, which lets the vest adapt to your level of effort to keep you dry at all times. The offset zipper facilitates layering and the multimedia pocket keeps your electronic devices warm. The Alpha is great for cycling, skiing and running. It keeps your core warm for unparalleled comfort. Very versatile, it will be a great asset and will make you want to wear it for almost all your cold-weather workouts.

1. X-Lite 19: Ultra light, wind-breaking, breathable
2. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
3. Polartec® Drytex® 6000: Brushed back double knit with moisture-wicking treatment to retain body heat
4. Strategically placed Polartec® Alpha® insulation
5. Full-length offset zip with reflective accents: Prevents zipper superposition in multi-layering
6. Inner flap and zip garage
7. Soft collar top: Enhances comfort during activities

Mid Season Hoodie

When temperatures near the freezing point, springtime fatbiking is often far more pleasant than facing cold winds on the road. The Mid Season Hoodie was designed for fall-winter cycling in mild conditions. This casual looking garment is in fact fully functional for riding as well as a mid-layer ideal for slack country skiing and perfect to warm up after sports. The top of the shoulders and elbows are covered with a very resistant fabric so as not to be damaged if you run into some branches.

1. Drytex® 4002: Warmth and moisture evacuation
2. Additional layer of Techfit at shoulders, chest and elbows for abrasion resistance, 4-way stretchability and comfort
3. Underarm inserts made with Polartec® Highlander Mesh to release heat and moisture build-up
4. Hood with visor fits under helmet and has slits on each side to secure the helmet straps through the hood
5. Mesh underarm maximizes moisture evacuation
6. Thumb loop at cuff: Offers added protection and maintains fit during activities

Course Element Tights

Finding the right wax for cross-country skiing is one thing, finding the right clothing combination in cold weather is another. For sure, the Course Element tights will prove ideal for all your winter training sessions in moderate to deep cold temperatures. The wind-breaking membrane at the front of the legs and calves is combined to a stretchable brushed fabric covering the back of the thighs. With a close to the body yet not too snug fit and soft inner face, these tights can be worn with a base layer or comfortably on their own. Perfect for warming up before winter sports competition or post-training, they are also great for intense activities such as running in the reduced winter daylight with reflective dots and asymmetrical reflective piping. A single zipped pocket allows you to secure items on-the-go.

1. Supra WindDry: 4-way stretch 3-ply softshell with breathable, windproof and warmth properties
2. Vertexx lining: Stretchability and thermoregulation
3. Windproof brushed fabric at front and lower back of calves: Protects from the elements and blocks snow splashing back on legs
4. Elastic waist with drawstring
5. 2 front pockets with zip
6. Stretchable ankle cuffs
7. 11"/28 cm ankle zips: Add comfort and allow easy removal

Alcové Hybrid Pants

If you're looking for a pair of pants that can do just about anything this winter, you've found them with the Alcové hybrid pants. This versatile style will prove quite useful over 3 seasons. Extra resistant fabrics, worthy of our mountain biking shorts, make them a great choice for fatbiking if branches come into view faster than expected. The seamless crotch is also reinforced to withstand the friction of pedaling. The thighs and behind are covered with Polartec® Alpha®, a fabric that has proven its worth for wind-breaking and insulation. The Alcové hybrid pants match their cousin, the Cove hybrid jacket, and are also great for any other type of fall, winter and spring outdoor activity. Their two zippered front pockets and reflective accents make them practical and safe at all times so you can fully enjoy the outdoors.

1. DirtMax: 4-way stretch woven fabric, breathable and DWR softshell
2. FreeFlow: Ultra light, wind-breaking, breathable
3. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
4. MTB 1x1 RIB: Stretchability and great fit
5. Strategically placed stretchable inserts of Polartec® Alpha® insulation
6. Zip fly with snap and hook-and-eye closure
7. Adjustable drawstring at waist

Enertec Pants

Every outdoorsman needs versatile pants like the Enertec. As our like-named coats, their vocation is to provide comfort, warmth and ventilation for your cold-weather adventures or training sessions. These casual softshell pants are ideal for snowshoe hikes, cross-country outings or any winter sports activities. The straight cut provides enough space to feel at ease and be able to add base layers underneath in colder temperatures. Ankle zippers and retractable elastic drawstrings allow you to adjust the lower leg as you see fit. Metal hooks offer a fastening option to secure the pants' leg to your boots to prevent snow from getting your feet wet. Stay warm and dry to fully enjoy the wonders of winter.

1. Enertec: 2-way stretch windproof DWR, breathable and abrasion-resistant 2-ply bonded softshell with brushed back
2. Drytex® lining: Retains body heat
3. Seamless inner leg: Prevents chafing and reduces bulkiness for increased comfort
4. Belt loops with elasticized drawstring: For optimal waist adjustment
5. Zip fly with snap and hook-and-eye closure
6. 2 front pockets with reversible zip
7. Front metal hook: Maintains pants' leg hooked to your boot's laces or loop

Providence Bib Tights

These are our all-around tights. The Providence Bib Tights is the garment you want to have if you enjoy several cold-weather endurance sports. The suspenders prevent them from sliding off your hips on effort, and the high degree of insulation of the Polartec® Wind Pro® fabric makes them an excellent choice for riding in colder weather, as well as for cross-country skiing or speed skating.

1. HeatMaxx: 4-way stretch opaque construction knit with brushed back
2. Additional layer of Light WindDry 2 at front, lower front and back: Offers protection against water and wind
3. Polartec® Light Wind Pro®: 4-way stretch wind-breaking and breathable hard-face knit with brushed back
4. Polartec® Highlander Mesh: Four-way stretchable mesh with excellent moisture management that allows quick drying and great comfort
5. Flatlock seams
6. Articulated knees
7. 9"/23 cm ankle zips
8. Signature ankle grippers
9. Reflective accents

Solano 2 Tights

For those who prefer tights without suspenders, the Solano 2 are certainly the most versatile. Their front face acts as a windbreaker, which makes them ideal for winter sports and cycling when cold winds set in. This protection, combined with their high ventilation, makes them a great asset to enjoy your training session, regardless of the weather.

1. HeatMaxx: 4-way stretch opaque construction knit with brushed back
2. Additional layer of Light WindDry 2 at front, lower front and back: Offers protection against water and wind
3. Elastic waist with drawstring
4. Flatlock seams

W's Cove Hybrid Jacket

The women's Cove Hybrid is an ideal choice for your snowshoe outings or everyday activities. It will keep you warm when you want to stroll around and enjoy the scenery, while preventing you from overheating when you tackle the steepest climbs on your path. What's more, not so long ago, clever were those who were able to dress for fatbiking and manage to be comfortable before, during and after their ride. This year, the Cove Hybrid is back and it's perfectly adapted for the needs of this increasingly popular sport that takes place in very low temperatures and often at high intensity. That is why the back of the jacket evacuates sweat while retaining body heat, thanks to supple fabrics that facilitate body movements when you're riding on a snowy path through the trees.

1. FreeFlow: Ultra light, wind-breaking, breathable
2. Polartec® Alpha® 100 g: Warm, extremely breathable
3. HeatMaxx: 4-way stretch opaque construction knit with brushed back
4. Drytex® soft collar top: Enhances comfort during activities
5. Full-length zip with reflective accents, inner flap and garage
6. Pockets located higher to allow access while wearing a belt bag or any backpack
7. 1 mesh inner pocket: Additional storage keeps your electronic device warm
8. Thumb loop at cuff
9. Hem with elasticized drawstring hidden inside pockets
10. Reflective accents

W's Enertec Jacket

Merge the ultra-breathability of a 2-ply bonded softshell with just the right amount of technical features and adopt the women's Enertec jacket as a favorite for your winter adventures and training sessions. Keep your core warm while moisture evacuates through the back thanks to a highly ventilated brushed fabric. The numerous front pockets, high enough to wear a waist pack, combined to a large back pocket are convenient to secure all your gear. This well-thought style works like a champ for cross-country skiing, snowshoeing, and for all your cold-weather activities.

1. Enertec: 2-way stretch windproof DWR, breathable and abrasion-resistant 2-ply bonded softshell with brushed back
2. Vertexx: 4-way stretch opaque construction light knit with brushed back
3. Drytex® soft collar top: Enhances comfort during activities
4. Full-length zip with inner flap and garage
5. Pockets located higher to allow access while wearing a belt bag or any backpack

W's Mayday Jacket

The women's Mayday has all it takes to become your favorite wind-breaker. This lightweight jacket is ideal for moderate winter conditions and can also prevent you from overheating during a high-intensity training session in colder weather. With its high degree of ventilation, its large wrists that allow you to wear a GPS watch and its compressive properties, this 4-season garment becomes a great tool as soon as brisk temperatures start to settle in.

1. Stonelite: Light, wind-breaking, breathable, DWR
2. MicroMesh lining: Moisture wicking
3. Packable
4. Full-length zip with reflective accents, inner flap and garage
5. Pockets located higher to allow access while wearing a belt bag or any backpack

W's Alpha Vest

When cold winds blow strong, riding or skiing becomes much less pleasant. The women's Alpha vest is a high performance insulating windbreaker that helps you start your training sessions without having to push to the max to warm up quickly. The front blocks the wind while the back evacuates perspiration, which lets the vest adapt to your level of effort to keep you dry at all times. The offset zipper facilitates layering and the multimedia pocket keeps your electronic devices warm. The Alpha is great for cycling, skiing and running. It keeps your core warm for unparalleled comfort. Very versatile, it will be a great asset and will make you want to wear it for almost all your cold-weather workouts.

1. X-Lite 19: Ultra light, wind-breaking, breathable
2. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
3. Polartec® Drytex® 6000: Brushed back double knit with moisture-wicking treatment to retain body heat
4. Strategically placed Polartec® Alpha® insulation
5. Full-length offset zip with reflective accents: Prevents zipper superposition in multi-layering
6. Inner flap and zip garage
7. Soft collar top: Enhances comfort during activities
8. 1 chest pocket with zip
9. Rear packable multimedia pocket with zip and flip-over puller

W's Mid Season Hoodie

When temperatures near the freezing point, springtime fatbiking is often far more pleasant than facing cold winds on the road. The women's Mid Season Hoodie was designed for fall-winter cycling in mild conditions. This casual looking garment is in fact fully functional for riding as well as a mid-layer ideal for slack country skiing and perfect to warm up after sports. The top of the shoulders and elbows are covered with a very resistant fabric so as not to be damaged if you run into some branches.

1. Drytex® 4002: Warmth and moisture evacuation
2. Additional layer of Techfit at shoulders, chest and elbows for abrasion resistance, 4-way stretchability and comfort
3. Polartec® Highlander Mesh: Four-way stretchable mesh with excellent moisture management that allows quick drying and great comfort
4. Hood with visor fits under helmet and has slits on each side to secure the helmet straps through the hood
5. Mesh underarm maximizes moisture evacuation
6. 2 front pockets with zip
7. Thumb loop at cuff: Offers added protection and maintains fit during activities
8. Ponytail opening at the back of hood

W's Course Element Tights

Finding the right wax for cross-country skiing is one thing, finding the right clothing combination in cold weather is another. For sure, the women's Course Element tights will prove ideal for all your winter training sessions in moderate to deep cold temperatures. The wind-breaking membrane at the front of the legs and calves is combined to a stretchable brushed fabric covering the back of the thighs. With a close to the body yet not too snug fit and soft inner face, these tights can be worn with a base layer or comfortably on their own. Perfect for warming up before winter sports competition or post-training, they are also great for intense activities such as running in the reduced winter daylight with reflective dots and asymmetrical reflective piping. A single zipped pocket allows you to secure items on-the-go.

1. Supra WindDry: 4-way stretch 3-ply softshell with breathable, windproof and warmth properties
2. Vertexx lining: Stretchability and thermoregulation
3. Windproof brushed fabric at front and lower back of calves: Protects from the elements and blocks snow splashing back on legs
4. HugFit waist with elastic drawstring: Evenly distributes pressure around the waist for a comfortable fit
5. 2 front pockets with zip
6. Stretchable ankle cuffs
7. 11"/28 cm ankle zips: Add comfort and allow easy removal

W's Alcove Hybrid Pants

If you're looking for a pair of pants that can do just about anything this winter, you've found them with the women's Alcove Hybrid pants. This versatile style will prove quite useful over 3 seasons. Extra resistant fabrics, worthy of our mountain biking shorts, make them a great choice for fatbiking if branches come into view faster than expected. The seamless crotch is also reinforced to withstand the friction of pedaling. The thighs and behind are covered with Polartec® Alpha®, a fabric that has proven its worth for wind-breaking and insulation. The Alcove Hybrid pants match their cousin, the women's Cove Hybrid jacket, and are also great for any other type of fall, winter and spring outdoor activity. Their two zippered front pockets and reflective accents make them practical and safe at all times so you can fully enjoy the outdoors.

1. DirtMax: 4-way stretch woven fabric, breathable and DWR softshell
2. FreeFlow: Ultra light, wind-breaking, breathable
3. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
4. Interknity: Comfort and warmth
5. Strategically placed stretchable inserts of Polartec® Alpha® insulation
6. Zip fly with snap and hook-and-eye closure
7. Adjustable drawstring at waist

W's Enertec Pants

Every outdoorswoman needs pants like the women's Enertec. As our like-named coats, their vocation is to provide comfort, warmth and ventilation for your cold-weather adventures or training sessions. These casual softshell pants are ideal for snowshoe hikes, cross-country outings or any winter sports activities. The straight cut provides enough space to feel at ease and be able to add base layers underneath in colder temperatures. Ankle zippers and retractable elastic drawstrings allow you to adjust the lower leg as you see fit. Metal hooks offer a fastening option to secure the pants' leg to your boots to prevent snow from getting your feet wet. Stay warm and dry to fully enjoy the wonders of winter.

1. Enertec: 2-way stretch windproof DWR, breathable and abrasion-resistant 2-ply bonded softshell with brushed back
2. Drytex® lining: Retains body heat
3. Seamless inner leg: Prevents chafing and reduces bulkiness for increased comfort
4. Zip fly with snap and hook-and-eye closure
5. Belt loops with elasticized drawstring: For optimal waist adjustment
6. 2 front pockets with zip
7. 11"/28 cm ankle zips with elasticized drawstring and puller adjustment system
8. Front metal hook: Maintains pants' leg hooked to your boot's laces or loop

4 Seasons Hoodie Jacket

A main element of the new winter mountain bike collection, the 4 Seasons Hoodie is the jacket of choice for cold-weather riding. It acts as a shell that protects you from wind, rain and snow as well as contributing to preserving body heat. In order to manage the varying moisture and excess heat according to your effort, simply open the zippers located at the armpits to let fresh air in. When the wind blows or unexpected rain starts falling, wear the hood over your helmet to stay protected and carry on with your adventure. Keep your essentials warm in the inner kangaroo pocket located at the back at the jacket and accessible via the side ventilation openings. And before you go, secure your electronic devices in the zippered chest pocket.

1. FENCE3L: 2-way stretch, 3-ply, waterproof, windproof and breathable
2. Sealed seams: Keep you dry
3. Full-length waterproof zip with inner flap
4. Hood designed to wear over a helmet
5. Inner rear kangaroo stow pocket: Protects your gear from the elements
6. Powder skirt: Inner feature that fits snugly on the waist, keeping snow from coming up inside your jacket
7. Snap loop system: Allows fastening the jacket to compatible MTB shorts
8. 2-way waterproof zips: Help manage core temperature and ventilation while allowing access to back kangaroo pocket system
9. Velcro-adjustable cuff
10. Zippered multimedia inner pocket
11. Reflective accents

Cove Hybrid Jacket

The Cove is an ideal choice for your snowshoe outings or everyday activities. It will keep you warm when you want to stroll around and enjoy the scenery, while preventing you from overheating when you tackle the steepest climbs on your path. What's more, not so long ago, clever were those who were able to dress for fatbiking and manage to be comfortable before, during and after their ride. This year, the Cove hybrid jacket is back and it's perfectly adapted for the needs of this increasingly popular sport that takes place in very low temperatures and often at high intensity. That is why the back of the jacket evacuates sweat while retaining body heat, thanks to supple fabrics that facilitate body movements when you're riding on a snowy path through the trees.

1. FreeFlow: Ultra light, wind-breaking, breathable
2. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
3. HeatMaxx: 4-way stretch opaque construction knit with brushed back
4. Drytex® soft collar top: Enhances comfort during activities

Mid Season Hoodie

When temperatures near the freezing point, springtime fatbiking is often far more pleasant than facing cold winds on the road. The Mid Season Hoodie was designed for fall-winter cycling in mild conditions. This casual looking garment is in fact fully functional for riding as well as a mid-layer ideal for slack country skiing and perfect to warm up after sports. The top of the shoulders and elbows are covered with a very resistant fabric so as not to be damaged if you run into some branches. The hood is designed for wearing under your helmet to retain your head's heat and has slots on each side that allow you to comfortably secure the helmet through the hood. A visor has been added to protect from the glare or the elements. Head outside and ride in style.

1. Drytex® 4002: Warmth and moisture evacuation
2. Additional layer of Techfit at shoulders, chest and elbows for abrasion resistance, 4-way stretchability and comfort
3. Underarm inserts made with Polartec® Highlander Mesh to release heat and moisture build-up
4. Hood with visor fits under helmet and has slits on each side to secure the helmet straps through the hood
5. Mesh underarm maximizes moisture evacuation
6. Thumb loop at cuff: Offers added protection and maintains fit during activities
7. 2 front and 1 chest zippered pockets

Lemmon LS Jersey

An unbeatable style in terms of value for money, the Lemmon LS jersey is perfect for the last days of summer, when the temperature is still comfortable although you can feel the air getting brisker. The Lemmon LS does the same job as a short-sleeve jersey/arm warmers combo to keep you warm in this coolness, but its ventilated fabric that's as comfortable as a soft cotton shirt will probably tip the scales in its favor once you've worn it on a ride. With its retro and discreet look, this jersey looks great on any type of rider. It's also a great first layer for winter training or to prolong your ride and, in turn, your cycling season.

1. AirFit 2.0: Peach skin fabric that increases air circulation and moisture wicking
2. AirFit Mesh: The semi-opaque structure and lightness of the mesh provide comfort, flexibility and excellent moisture control
3. Silicone gripper at hem
4. Full-length zip
5. 3 angled rear pockets with reflective trim and extra mesh pocket

Alcové Hybrid Pants

If you're looking for a pair of pants that can do just about anything this winter, you've found them with the Alcové hybrid pants. This versatile style will prove quite useful over 3 seasons. Extra resistant fabrics, worthy of our mountain biking shorts, make them a great choice for fatbiking if branches come into view faster than expected. The seamless crotch is also reinforced to withstand the friction of pedaling. The thighs and behind are covered with Polartec® Alpha®, a fabric that has proven its worth for wind-breaking and insulation. The Alcové hybrid pants match their cousin, the Cove hybrid jacket, and are also great for any other type of fall, winter and spring outdoor activity. Their two zippered front pockets and reflective accents make them practical and safe at all times so you can fully enjoy the outdoors.

1. DirtMax: 4-way stretch woven fabric, breathable and DWR softshell
2. FreeFlow: Ultra light, wind-breaking, breathable
3. Polartec® Alpha® 60 g: Warm, extremely breathable insulation
4. MTB 1x1 RIB: Stretchability and great fit

Off Season Shorts

Never let the season end with the Off Season shorts. Designed with the best features of our mountain bike shorts, these softshell shorts are made with the tried and tested Enertec fabric. Not only is it ultra-breathable, but it is also resistant to abrasion and stretchable to allow maximum performance. Fitted to wear over tights or winter base layers, these shorts will come in handy for winter riding as well as for pre-race warmup. The bulky zipper pullers and rubber trims make adjustments easy with gloves... or frozen fingers. Enjoy the convenience of 2-way zippers on the side of the legs that can be pulled down for additional ventilation or up to take the shorts off without having to remove your boots. And when wearing the 4 Seasons jacket, make sure to secure the powder skirt with the outer loop system.

1. Enertec: 2-way stretch windproof DWR, breathable and abrasion-resistant 2-ply bonded softshell with brushed back
2. MTB 1x1 RIB: Stretchability and great fit
3. Drytex® 8: Retains body heat
4. 2-way zip on side of leg: Allows heat regulation and easy removal with boots on
5. Snap loop system: Compatible with LG innershorts and inner bib
6. Zip fly with snap and hook-and-eye closure
7. Adjustable waist with belt loops and Velcro tabs
8. 2 front pockets plus 1 waist back pocket with zips
9. Seamless inner leg to reduce saddle bunching
10. Outer loop system: Allows fastening the shorts to a compatible jacket

W's 4 Seasons Hoodie Jacket

A main element of the new winter mountain bike collection, the women's 4 Seasons Hoodie is the jacket of choice for cold-weather riding. It acts as a shell that protects you from wind, rain and snow as well as contributing to preserving body heat. In order to manage the varying moisture and excess heat according to your effort, simply open the zippers located at the armpits to let fresh air in. When the wind blows or unexpected rain starts falling, wear the hood over your helmet to stay protected and carry on with your adventure. Keep your essentials warm in the kangaroo inner pocket located at the back at the jacket and accessible via the side ventilation openings. And before you go, secure your electronic devices in the zippered chest pocket.

1. FENCE3L: 2-way stretch, 3-ply, waterproof, windproof and breathable
2. Sealed seams: Keep you dry
3. 2-way mid-length waterproof zip with flap: Pull-over and allows ventilation
4. Hood designed to wear over a helmet
5. Inner rear kangaroo stow pocket: Protects your gear from the elements
6. Powder skirt: Inner feature that fits snugly on the waist, keeping snow from coming up inside your jacket
7. Snap loop system: Allows fastening the jacket to compatible MTB shorts
8. 2-way waterproof zips: Help manage core temperature and ventilation while allowing access to back kangaroo pocket system
9. Velcro-adjustable cuff
10. Zippered multimedia inner pocket
11. Reflective accents

Merino Prima

W's Merino Prima

Keep your traditional wool socks to relax around the fireplace after your fall and spring training. Merino socks are the perfect choice for outdoor sports in cold weather. Made with soft merino wool, these socks offer great moisture evacuation in spite of their high thermal insulation. This amazing thermoregulation capacity, combined with the lightness and fast-drying properties of Primaloft® yarn, allows you to fully enjoy your outdoor activities with warm and dry feet.

38% MERINO WOOL • 32% PRIMALOFT® • 12% POLYESTER • 12% NYLON • 6% LYCRA® fiber

1. Primaloft® yarn and merino wool: Offers superior softness and moisture wicking at a lighter weight
2. Slightly compressive double-layered cuff: Fit, comfort and added protection against the cold
3. Breathable mesh
4. Hand-linked toe seam for superior comfort
5. Anatomic arch support: Optimal fit
6. Lightly cushioned zone: Provides added warmth and comfort
7. Durable, reinforced heel and toes
8. LG X-Long: 8"/20 cm (men) - LG Long 7"/18 cm (women)

- Ventilation
- Support
- Reinforcement
- Cushioning

Ghost MIPS

When it comes to winter activities, most helmets designed for this purpose are hot and heavy. With its 350 g monocoque construction, the Ghost MIPS helmet is lightweight, making it enjoyable to wear for sports such as fatbiking, alpine skiing or snowboarding. The vents offer the perfect balance between ventilation and heat retention for the coldest winter days. The MIPS system can reduce the rotational forces your head is submitted to during an impact. Now more than ever, you can have fun and be safe during your winter activities.

1. **Construction:** In-Mold, 10 vents. Evacuation channels. MIPS Multidirectional Impact Protection System.
2. **Stabilizing system:** Spiderlock® Creo
3. **Padding:** Cushioned fitting hat
4. **Earpads:** Detachable earpads for cold protection
5. **Goggle fastener**
6. **Certifications:** ASTM F2040 / CPSC 1203 for winter cycling
7. **Weight:** 12.4 oz/350 g

Klondike

The Klondike is optimized to offer just the right thickness of insulation according to the area of the foot it covers. It will especially keep your toes and upper foot well protected in any temperature. The outsole is adapted for winter conditions, with studs that remain flexible in the coldest temperatures. Inside the shoe, the comfort of a cross-country ski boot equipped with the Boa® system awaits your foot. What's not to like? You won't even look forward to summer anymore!

1. **High volume fit last:** Based on a 'EEE' volume to be able to wear thicker socks in cold temperatures
2. **Upper:** Cordura 1680D with 400 g Thinsulate™ to resist low temperatures down to -20°C/-4°F
3. **Closure system:** Boa® IP1 with two-way micro adjustment for easy access while riding
4. **Outsole:** VIBRAM® DURATREK, specially made to stay supple in cold weather for good traction
5. **Insole:** 3-layer construction with felt, 3 mm PE and foil to block the cold from the outsole
6. **Cleats:** SPD cleat with removable SPD protector fits all major MTB pedals

0° LS-100

All the features of the 0° LS-100 shoe contribute to making it the perfect shoe for the cyclist that won't stop riding because of some bad weather. To keep your feet warm and dry, the shoe has an insulated inner sole, fully seam-sealed water-resistant 3 mm neoprene, a lined interior and a base of 4 mm foam insulation with waterproof membrane coated lining.

1. **STD FIT:** Roomier fit offers more comfort for all-day riding
2. **Upper:** Synthetic fabric entirely seam-sealed for water resistance
3. **Closure system:** Boa® L4 one-way micro-adjustment with flap for extra protection
4. **Outsole:** Carbon T-FLEX composite outsole with dual-density lugs provides better mud evacuation and prevents heel pressure
5. **Insole:** Insulated to keep feet warm

Gros Louis 0

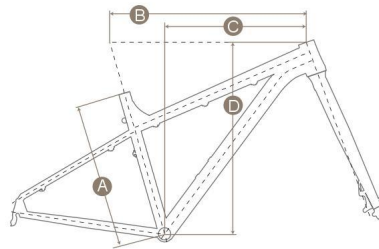

1304430 | S-L

It is tempting to go winter cycling to relax and enjoy the charming scenery. But there is a breed of riders that just can't resist taking the start of a race, lured by that adrenaline rush they can't find anywhere else. The Gros Louis 0 is there to fulfill the need of those start line junkies 12 months a year. This pure carbon racing machine offers lightness and stiffness to fly through the woods. Equipped with a rigid fork at the front and a rear derailleur only, this race steed was designed to negotiate fatbike courses at the head of the pack. The best athletes need to be sure they have the best gear to win. With the Gros Louis 0, there are no compromises. After all, the off-season is way too boring.

Gros Louis 2

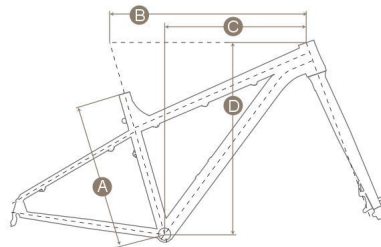

1304271 | S-XL

To explore the many facets of fatbiking, whether it be adventure – capital A, performance handling in snowy forests or simply enjoying a winter stroll, the Gros Louis 2 is at your service for fun and thrills. Its aluminum frame is designed close to the ground, which allows you to easily get back on the saddle even with both feet in powder snow. Add to that hydraulic disc brakes designed for winter conditions, clearance for 5-inch tires and a choice of two colorways, and all that's left to do is head out on your next adventure.

Frame	Garneau Gros Louis susp. corrected, S-6 butted alloy, ID12 x 197 mm	Chain	KMC X10 EPT, 1/2 x 11/128" w/ Eco Proteq	Grips	Kraton 130 mm, lock-on

Duchess 2

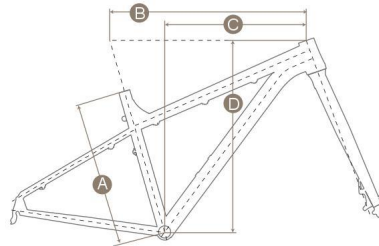

1304429 | S-M

Beautiful winter landscapes are an endless source of awe. Give yourself the tools to discover new snowy sceneries by going further with a fatbike designed specifically for women. If a snowshoe hike of a few kilometers delights you, imagine what you can discover by exploring the forest on two wheels. The Duchess is perfect to let you rediscover winter. This aluminum bike designed for the snow offers a geometry that is different from the men's models, with a lower top tube than the Gros Louis frame. You can therefore easily get back in the saddle even with both feet in deep powdery snow. Add to that hydraulic disc brakes designed for winter conditions and 5-inch tires that literally float on the snow, and you're all set to head out for your next adventure.

Frame	Garneau Duchess, S-6 butted alloy, ID12 x 197 mm	Chain	KMC X10 EPT, 1/2 x 11/128" w/ Eco Proteq	Grips	Kraton 130 mm, lock-on

Gros Louis 3

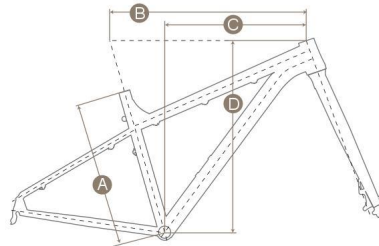

1304273 | S-XL

Fatbikes aren't a trend, they're here for the long run. If you're thinking of purchasing one, it might not be the only bike you have at home. The Gros Louis 3 was designed to make fatbiking more accessible. Its 4-inch tires provide excellent adherence on the paths and the mechanical disc brakes are ready for duty in spite of the harshness of winter. We understand that you enjoy your cross-country skis, but you're a cyclist above all. Admit it, your stationary bike is suddenly much less appealing... So what are you waiting for? Go play outside!

Frame	Garneau Gros Louis, S-6 alloy, ID10 x 170 mm	Cassette	Shimano CS-HG300, 12-36T, 9-speed	Handlebar	A-Spec, butted alloy, 31.8 mm

Gros Louis 24

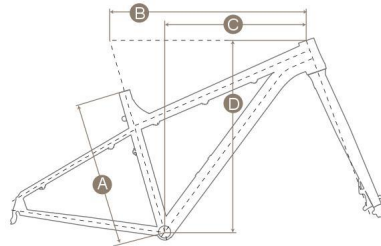

1304428 | OS

Childhood is the part of our lives where we spend the most time playing outside. Imagine what your kids think when they see you heading out on our fatbike... Transform your new favorite winter sport into a family activity by putting your child on a Gros Louis 24. Riding on the snow requires quite a bit of balance, and the main advantage of this footing is to be able to fall and laugh about it. Falling off a fatbike is not like falling off any other type of bike; it's fun and all part of the game. In addition, the geometry of the Gros Louis 24 frame allows your kid to easily get back in the saddle even with both feet in the snow. Between a winter bike and a new video game console, the choice is easy. There's a great idea for quality family time.

Frame	Garneau Gros Louis 24, butted alloy, ID10 x 170 mm	Chain	KMC X9RB, 1/2" x 11/128" w/Rust Buster treatment	Grips	Kraton 130 mm, lock-on

2004 Pants

When practicing winter sports, wearing a very thin first layer of clothing that allows moisture to be evacuated is ideal. The 2004 long-sleeve top and pants are perfect base layers to keep you dry all winter. Antibacterial and antiodor properties make them ideal complements to the warmer clothes you are wearing over it. The Drytex® 2004 fabric dries very quickly to ensure maximum comfort before and during your training session. In addition, if you stop to take a break in a cabin before heading back out into the woods, you'll still be warm and dry to enjoy the rest of your day.

1. Drytex® 2004: 4-way stretchable peach skin fabric that increases air circulation and moisture wicking; antibacterial treatment offering freshness and comfort
2. Thumb loop at cuff: Offers added protection and maintains fit during activities
3. Flatlock seams
4. Reflective accent

W's 4000 Zip Top

The time for undergarments that keep you warm but often also soaked is over. Like their predecessors in the history of base layers for the cold season, the women's 4000 top and pants are designed to offer maximum warmth in the middle of winter so you can enjoy your outdoor activities in total comfort. These affordable models are made of brushed fleece to keep you nice and dry when you are skiing, skating, snowshoeing, at the slides with your family, or any other outdoor activity that allows you to enjoy the wonders of wintertime.

1. Drytex® 4000: Warmth and moisture evacuation
2. Mesh: Ventilation
3. Reversed 8"/20.5 cm zip with inner flap and zip garage: Allows to slip off easily, adds comfort and protects the chin
4. Flatlock seams

W's 4002 Zip Neck

W's 4002 Pants

As mid-weight base layers, the women's 4002 top and pants are intended as mid-layers for colder conditions. The soft ribbed inner face construction wicks moisture away and creates air pockets that store your body heat. The jersey is thought for training with features such as the overlapping mitts to tuck your hands away from the cold, reflective bindings at the cuffs to make you visible at all times, and a 2-way zip to ventilate your core while keeping your neck warm.

1. Drytex® 4002: Warmth and moisture evacuation
2. AirFit Mesh: The semi-opaque structure and lightness of the mesh provide comfort, flexibility and excellent moisture control
3. Seamless front neck: Adds comfort and ease of movement
4. Two-way reversed 12"/30.5 cm zip with mesh insert: Allows for core ventilation while keeping neck warm
5. Zip garage: Prevents neck irritation
6. Fold-over cuff with thumb loop: Turns into a mitt for increased warmth

W's Training Top

For those days when the temperature seems to be colder than reason yet the crisp air calls out, put on the women's Training base layer combo and you're set to rock the day away until the sun goes down. The thick but super stretchable fabric offers unparalleled thermal protection and range of movement as an under layer. For boundless adventures, the women's Training top and pants will surely keep you warm in the harshest winter conditions.

1. Polartec® Drytex® 6000: Brushed back double knit with moisture-wicking treatment to retain body heat
2. Seamless front neck: Adds comfort and ease of movement
3. Front 12"/30.5 cm invisible zip with inner flap: Allows to slip off easily and adds comfort

Merino wool and cashmere, a heavenly combination for unparalleled softness, comfort and warmth.

60% MERINO WOOL • 15% CASHMERE • 13% POLYESTER • 7% NYLON • 5% LYCRA® fiber

1. Cashmere: Extreme softness, warmth and lustrous quality. The fineness of the fiber gives cashmere its incredible soft, silky smooth feel and allows moisture absorption
2. Merino wool: Odor resistant thanks to its antimicrobial properties, offers excellent moisture wicking and thermoregulation as well as exceptional softness
3. Extremely stretchable cuff: Reduces pressure points and increases blood flow
4. Mesh zone on upper foot: Increases moisture wicking and aeration
5. Elastic band at upper and under foot as well as arch support: Comfort and stability
6. Fully cushioned zone and reinforced heel and toes: Comfort and durability

ERGO AIR®

The Ergo Air® system efficiently manages moisture for excellent body thermoregulation. When the body sweats, the Ergo Air® system keeps it dry, thus avoiding discomfort caused by excess body heat or increased cold resulting from moisture.

(USA: 6,845,519 / CAN: 2,419,330) All Louis Garneau gloves are built around our unique Ergo Air® system for maximum breathability and protection against the elements.

HIVIZ360

The HiViz Collection was developed so you could enjoy more and worry less. We know that being seen quickly by other road users, in more conditions, will result in greatly reduced risks of collision.

With the integration of bright-color fabrics, glow-in-the-dark treatments and superior reflectivity elements on all sides for 360-degree visibility, we worried about your safety so that you could ride with peace of mind.

The road is meant to be shared. Ride brighter, ride safer.

Verano

W's Verano

W's Verano mitt

The Verano is the ultimate performance glove for winter sports. In addition to preserving maximum heat, this wind-breaking model has impressive moisture evacuation capacities for your cold-weather efforts. Perfect for both cross-country ski racing and training, this glove is also offered as a women's mitt. In all its versions, the Verano lets you train at high intensities without ending up with soaking wet hands at the top of a long climb. A ventilation of such efficiency prevents the glove's internal temperature from dropping after the effort and leaving your hand exposed to the cold. No one likes having cold hands. That is an excellent reason to equip yourself with a good glove that will let you reach your training goals without worrying about your gear.

1. Upper hand: Enerblock softshell
2. Reinforced Amara palm
3. Fitted neoprene cuff with Velcro fastener
4. Outside stitching at fingers: Maximizes comfort
5. 100 g PrimaLoft® insulation: Provides optimal warmth and comfort
6. Micro Bemberg fleece lining: Provides optimal comfort and additional warmth
7. 3M reflective logo: High visibility
8. Patented Ergo Air® concept¹: Evacuates palm moisture and helps stabilize hand temperature

Raaj

W's Raaj

Made with genuine leather and a high-quality wind-breaking fabric, the Raaj gloves and mitts are ideal for performance-oriented winter sports. They were designed to provide maximum warmth and comfort, whether it's for cross-country skiing, snowshoeing or any other cold-weather sports activity. Their look and multisport conception offer numerous advantages. They are very well insulated thanks to the leather that covers the fingers and the palm. That same leather combined with the wind-breaking membrane at the back of the hand make the Raaj a high-end model that is very stretchable and resists water, cold and wind.

1. Upper hand: Genuine leather • Softshell
2. Reinforced genuine leather palm
3. Ergonomic cuff
4. Elastic strap with Velcro at wrist for a tailored fit and to seal the cold out
5. 100 g PrimaLoft® insulation, TR2 interlining: Provide optimal warmth and comfort
6. Patented Ergo Air® concept¹: Evacuates palm moisture and helps stabilize hand temperature

W's Raaj mitt

Made with genuine leather and a high-quality wind-breaking fabric, the Raaj gloves and mitts are ideal for performance-oriented winter sports. They were designed to provide maximum warmth and comfort, whether it's for cross-country skiing, snowshoeing or any other cold-weather sports activity. Their look and multisport conception offer numerous advantages. They are very well insulated thanks to the leather that covers the fingers and the palm. That same leather combined with the wind-breaking membrane at the back of the hand make the Raaj a high-end model that is very stretchable and resists water, cold and wind.

1. Upper hand: Genuine leather • Softshell
2. Reinforced genuine leather palm
3. Ergonomic cuff
4. Elastic strap with Velcro at wrist for a tailored fit and to seal the cold out
5. 100 g PrimaLoft® insulation, TR2 interlining: Provide optimal warmth and comfort
6. Patented Ergo Air® concept¹: Evacuates palm moisture and helps stabilize hand temperature

Course Boa®

The Course Boa® snowshoe is designed to let you run in the woods almost as fast as you would on the street. Its race-proven super lightweight aluminum frame is combined with the renowned Boa® fastening system, making it the ultimate tool for snowshoe racing. The stiffness of its components allows a very efficient and stable stride. The Course Boa® was designed with the idea of offering a lightweight yet reliable racing snowshoe. Its ultra resistant materials won't let you down so you can reach all your training goals.

- Momentum frame:** Aircraft-grade 7075-T6 anodized aluminum frame ensures toughness and lightness. Improves stride efficiency with narrow width and optimal surface area (123 in²).
- Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
- Weave Lite decking:** Optimized cut reduces weight while providing abrasion resistance for a puncture-proof and stretch-proof deck.
- Snowfree surface:** Excellent snow shedding.
- Attack crampons:** Aggressive crampons that offer great control on the tracks. Made with 7075-T6 black anodized aluminum.
- Reflex Pro+ pivot:** Provides shock absorption and good foot rotation on axle for an efficient stride. The torsional stiffness obtained by stainless steel mesh encased within the suspension band provides great response for sharp turns.
- Contact Grip harness:** Optimizes foot-to-snowshoe stability for better response on the race track.
- Lifetime limited warranty.**
- Designed according to the USSSA standards for snowshoe racing.**

Transition Boa®

Perfect for racing and trekking alike, the Transition Boa® is a stylish speedster. With its great look and sound engineering, this snowshoe is sure to please. If your winter is comprised of both hiking and racing, if you prioritize stamina but occasionally work at high intensity, look no further and choose this snowshoe that will provide the efficiency you need at any speed you want to go. But make no mistake: although its design and functionalities are rather athletic, the Transition Boa® is very sturdy and will prove just as capable of taking you on paths less traveled. This snowshoe combines functionality, lightness and style.

1. **Perimeter+ frame:** 6061-T6 anodized aluminum, custom triangular cross section. Enhanced peripheral traction for a superior transversal hold.
2. **Single Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
3. **Lightec decking:** Resistant, lightweight, and flexible down to -40°C.
4. **Assault front crampons:** Aggressive 7075-T6 aluminum crampons that offer 360-degree traction on any type of terrain. Considered the most innovative crampons, they remain firmly "toothed" to the terrain even as your foot pivots for treading.
5. **Instinct pivot:** Natural stride and shock-absorbing suspension.
6. **Contact Grip harness:** Optimizes foot-to-snowshoe stability for better response on the race track.
7. **Lifetime limited warranty.**

Phenom

A product designed for the outdoor expeditioner. Built tough and expedition-boot ready, this minimalist design caters to hikers who want to cover the distance. To hike to a faraway cabin, to get to the foot of the ice wall you want to climb or to reach the summit of a mountain to slide back down on your skis or snowboard, the Phenom will prove to be a partner of choice.

This snowshoe was specially designed to be used with expedition or snowboard boots. Super aggressive crampons provide traction and control when crossing over logs, rocks and ice obstacles. Its ultra-resistant decking completes a triangular frame that bites the snow for absolute control.

This minimalist snowshoe that can be easily carried on a backpack is all set and ready for your next expedition.

1. **Perimeter+ frame:** 6061-T6 anodized aluminum frame. Light and sturdy with great peripheral traction and superior transversal hold provided by a triangular geometry.
2. **Single Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
3. **Weave Lite decking:** Provides the thinnest and strongest polyurethane-encased nylon mesh.
4. **CORE crampons:** 360-degree crampon system offering unequaled traction on any surface.
5. **Contact Ultimate harness:** Platform offering 360-degree retention for optimal support on any type of terrain. Designed specially for expedition and snowboard boots.
6. **Freemotion pivot:** Free foot rotation on axle for an efficient stride.
7. **Gradient heel raiser:** Reduces calf fatigue while climbing.
8. **Lifetime limited warranty.**

Versant / W's Versant

As its name suggests, the Versant snowshoe is the one you need to conquer the mountain by any path you choose. This ascension is not a race, nor a sprint, it's an expedition. The Versant is intended for adventurers who aren't afraid of climbing, even with loaded backpacks. Its lightweight design prevents your feet from sinking in the snow with every step, which allows you to save energy. With its heel raiser for sloped terrains and Boa® fastening system that evenly holds your foot, you have the right tools to climb up the mountain in total comfort and enjoy the purity of the moment.

1. **Contour frame:** Proven ergonomics for a natural stride and optimized surface area with great snow shedding capacities. Aircraft-grade 7075-T6 anodized aluminum ensures toughness and lightness.
2. **TRAXION SS crampons:** Stainless steel crampons provide maximum traction uphill, traverse and downhill.
3. **Dual Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
4. **Connect fastener system:** Durable fastening system offers optimized lateral traction in an eco-friendly design.
5. **Weave decking:** Offers the greatest abrasion resistance while its ripstop design ensures a puncture-proof deck.
6. **Freeflex pivot:** Provides shock absorption and free foot rotation on axle for an efficient stride.
7. **Contact Pro harness with EVA padding:** 360-degree retention for optimal support on various terrain conditions.

Victory

We created the Victory for those who love everything about snowshoeing. Whether it's to get your heart pumping during a short but intense exercise or to explore your region over a weekend, this unique snowshoe's versatility will surprise you.

This new model features the best elements of our proven designs. Its offers maximum floatability and optimal traction while being lightweight. This means an efficient and ultra smooth stride with no compromise on comfort, thanks to the Boa® fastening system that secures your boot evenly without pressure points. When the slopes are steep and calves start to burn, the heel raiser will allow you to enjoy the climb instead of enduring it. The Victory merges our best traction and lightness features to create an effective snowshoe.

1. **SERAC frame:** 6061 aluminum triangular frame, heat-treated for hardness and stiffness and anodized for wear protection. Triangular extrusion profile V-Frame for full perimeter traction. Proven ergonomic shape for a natural stride and optimized surface area.
2. **Traxion HCS front crampons:** High carbon steel crampons for multidirectional traction.
3. **Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
4. **Lightec decking:** Resistant, lightweight, and flexible down to -40°C.
5. **FREEFLEX & ISOTONIC pivots:** Ensure a natural stride in a strong suspension pivot strap providing great lateral tail control for tight navigation.
6. **SERAC harness:** Race-inspired system for soft boot adventures. Non padded for a slim foot responsive feeling.
7. **Gradient heel raiser.** Reduces calf fatigue while climbing.

Everest

716 / LIME

The Everest is aptly named. To conquer the highest peak in your neck of the woods, you need the right tools. This snowshoe was made for climbing, with a set of metal crampons that bite into the snowy hill. What's more, its polymer deck provides lightness and comfort as snow easily glides off. This snowshoe was named 2014 Gear of the Year by Outside Magazine for its combination of features and its amazing functionality. It offers great traction, superb ergonomics, features designed to take on the steepest mountain, and all that at a surprising weight.

- EDGE molded polymer deck:** Lightweight, sturdy, and resistant down to -40°C. U-BAR technology reinforces the underside for a responsive perimeter while a stiff underfoot provides lively, reliable strides.
- Zero Boundary HCS and V-Rail crampons:** Absolute traction on any terrain. High carbon steel and rust-protected by a zinc oxide coated with a polymer powder coat.
- Single Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
- Freemotion pivot:** Free foot rotation on axle for an efficient stride. The rotation controller prevents the snowshoe from hitting the leg.
- Contact harness with EVA padding:** 360-degree retention for optimal support.
- STEP UP heel raiser:** Reduces calf fatigue while climbing.
- Snowfree surface:** Excellent snow shedding from deck.
- Lifetime limited warranty.**

W's Boreal II

1493142

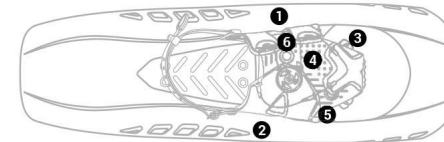

825

8W6 / PURPLE

The Boreal II is and remains a flagship for polymer snowshoes. Very different from aluminum frames, this structure optimizes the comfort of your stride and gives you the impression you're walking on a cushioned surface. With the same snow shedding capacities and the same reliability as the original version, this sleek-looking classic model is light, sturdy, offers exceptional traction and will without a doubt be a hit on the trails.

1. **Ergoshape + frame:** Excellent snow shedding underfoot and easy, natural stride. Deck design maximises diagonal ribbing and surface geometry for a stiff yet lightweight structure. The polymer molded deck is light, sturdy and resistant down to -40°C.
2. **Frame structure:** U-BAR technology, U-shaped profile reinforcing the deck structure .
3. **CRUX crampons:** Carbon steel front crampons that provide multidirectional traction for all terrains and snow conditions.
4. **Single Boa® closure system:** User-friendly, winter-proof and lifetime warranty. "The best closure system on the market."
5. **Fixed pivot:** Excellent foot rotation on axle and good lateral heel stability.
6. **Contact harness with EVA padding:** 360-degree retention for optimal support on various terrain conditions.
7. **Lifetime limited warranty.**

Appalaches / W's Appalaches

There are some winter days where it's way too nice outside not go out for some fresh air. Snowshoeing is a simple and affordable option, and the Appalaches meets your needs. This model is perfect for a stroll in the paths nearby. Its proven sturdiness and reliability make it a snowshoe you can count on to enjoy the outdoors. With its easy to use conventional fastening system, the Appalaches is an accessible model for all types of budget but also for those who just want to go play outside.

1. **Contour frame:** Light and sturdy 6061-T6 anodized aluminum frame. Proven ergonomics for a natural stride and optimized surface area with great snow shedding capacities. Connect system fastens decking to frame while providing good lateral stability.
2. **Closure system:** 3D Comfort+ harness offers secure footing for great control in all snow conditions.
3. **Lightec decking:** Resistant, lightweight, and flexible down to -40°C.
4. **Traxx+ crampons:** Carbon steel crampons that provide multidirectional traction for all terrains and snow conditions.
5. **Freeflex pivot:** Provides shock absorption and free foot rotation on axle for an efficient stride.
6. **Lifetime limited warranty.**

Ghost MIPS

When it comes to winter activities, most helmets designed for this purpose are hot and heavy. With its 350 g monocoque construction, the Ghost MIPS helmet is lightweight, making it enjoyable to wear for sports such as fatbiking, alpine skiing or snowboarding. The vents offer the perfect balance between ventilation and heat retention for the coldest winter days. The MIPS system can reduce the rotational forces your head is submitted to during an impact. Now more than ever, you can have fun and be safe during your winter activities.

1. **Construction:** In-Mold, 10 vents. Evacuation channels. MIPS Multidirectional Impact Protection System.
2. **Stabilizing system:** Spiderlock® Creo
3. **Padding:** Cushioned fitting hat
4. **Earpads:** Detachable earpads for cold protection
5. **Goggle fastener**
6. **Certifications:** ASTM F2040 / CPSC 1203 for winter cycling

Eyewear

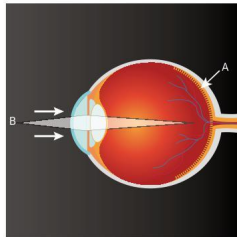

VALYRIAN COATED LENS

Better glare reduction with high-end smoke mirror or multi-layer revo-coated lens.

ADJUSTABLE BRIDGE AND STEMS

Made of supple aluminum alloy and fitted with hydrophilic rubber padding, the adjustable bridge allows for better positioning and great comfort without slippage.

HD LENSES

HD lenses are designed to provide sharper vision and increased clarity, meaning colors appear more defined and detailed.

The retina of the eye is composed of rods and cones (A). Rods are responsible for the perception of light intensity, while cones provide the eye's color sensitivity. Pink HD lenses filter wavelengths perceived by the rods and allow transmission of the wavelengths perceived by the cones. Therefore, they reduce light (B) intensity while improving color perception.

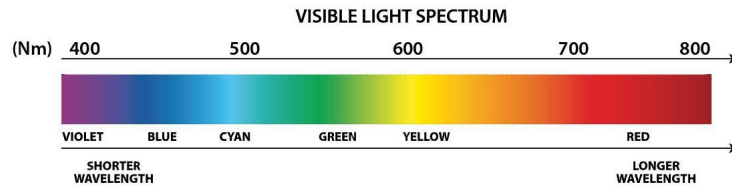

Within the visible light spectrum, the wavelengths from blue to violet are the ones responsible for eye fatigue. Pink HD lenses filter a greater part of these wavelengths and will therefore limit eye fatigue during long training sessions or during races when concentration is vital.

TRANSFORMER SYSTEM

The Transformer system includes two or three interchangeable polycarbonate lenses to accommodate visual distortion caused by varying light intensity and weather conditions.

Practical and functional, it's designed for quick lens changes to adapt to your activities.

LG1 Sports Drink

Performance or recreational enthusiasts alike need an energy source to replenish electrolytes in a tasty formula that is easy to drink and digest. This was our most important premise for the development of our triad of tastes. Tried and tested by athletes of all levels.

1. A balanced formula with low amounts of simple sugars and complex carbohydrates to deliver intense and prolonged energy sources while you push your body to new limits.
2. An energy hydration recipe offered in 3 flavors, geared to resupply and replenish lost minerals with 2 key electrolytes.
3. Great-tasting due to its smart mix of quality ingredients, well-balanced minerals and antioxidants (Vitamins C and E). Great-tasting also means you won't forgo drinking while managing your race/training efforts.
4. Available in tubs, but also in convenient pouches. Keep some in the jersey, stuff musettes or anywhere near your gear for a quick grab for another great training or race!

LG1 Energy Gel – Box of 24

LG1 Gels come from the need to have great-tasting, easy-to-digest flavorful athletic fuel. We put together a varied menu with the right fuel mixture that can cater to your training and racing experience.

1. A well balanced race/training gel composed of key electrolytes, antioxidants* and complex sugars formula for a no-sugar-peak, easy-to-digest, replenishing and great-tasting athletic fuel.
2. 8 easy-to-digest flavors to choose from and create variety on the circuit. 3 gel flavors are caffeinated and another has EXTRA electrolyte, for those extra hot summer months of training/racing.
3. Real fruit juice, key electrolytes, great consistency and a perfect carbohydrate balance create a great mouthfeel that goes in easy when your body needs to resupply.
4. Gluten-free, dairy-free, free of coloring agents, artificial sweeteners or fake flavors; only great-tasting ingredients put together by the Louis Garneau nutrition team.

* Note: Espresso flavor provides 125 mg of caffeine in a single dose and contains less antioxidants.

HOW TO FIND YOUR SHOE SIZE

1

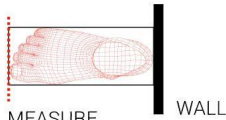

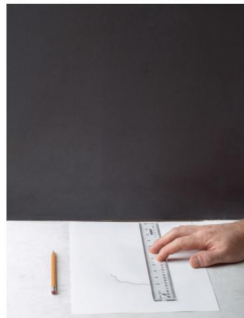

Place a sheet of paper on a flat surface against a wall and align your heel to the edge the wall.

2

Trace a line at the end of your toes.

3

Take the measure from your longest toe. Make sure to measure both feet. The measure of the longest foot is the size to use.

SIZING CHART				MEASUREMENT OF YOUR FOOT
LG (EURO)	US MEN	US WOMEN	UK	CM
36	4	6	3	22.7
37	4.5	6.5	3.5	23

49	13	-	12	29.9
50	13.5	-	12.5	30.2

The Garneau Standard fit is C. If your foot is larger than standard (D fit and over), we recommend choosing a half-size larger than the size suggested on the chart.

If you are purchasing shoes to wear mainly in fall/winter with thicker socks, we recommend measuring your feet with the socks you'll be wearing with the shoes.

SHOES

RACER FIT

Close to the foot for increased sensation and power transfer.

STANDARD FIT

Great performance without compromising comfort.

WOMEN STANDARD FIT

Specially designed for the female foot anatomy for great performance without compromising comfort.

Garneau is pushing forward at full speed into the sport of speed skating! Starting this winter, we are offering a complete line of accessories as well as unique skates equipped with the Boa® fastening system. Fully-sublimated customizable suits are also offered to clubs of all regions. The entire Garneau speed skating collection offers the best protection in the industry. The learning process of this wonderful sport in complete comfort and safety starts here.

Speed skating
