LOUIS GARNEAU

est. 1983

Fall / Winter **2021-2022**

For me, cycling is an art of life!

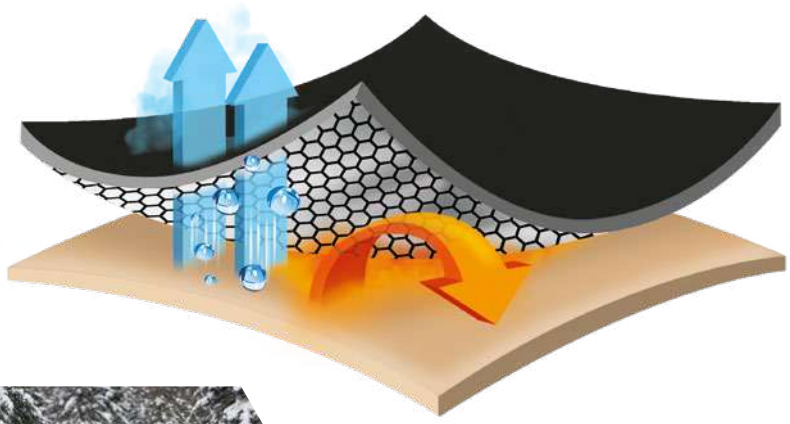
If you ever come to St-Augustin-de-Desmaures near Quebec, stop by the head office, and I will show you my art gallery and the bike museum!

Louis Garneau – President, Fonder

Metal Heat technology

The Metal Heat technology, already used in outdoor world, has never been used by any cycling companies to date. The idea came from Louis himself, who used to ride with newspapers under his jersey. When you cross-country ski or ride your bike, your front chest is the one facing the wind and cold as you move. Keeping your lungs warm will help you breath and perform better.

The Metal heat, used as an insert inside the top of the garment, keeps the warmth inside. This fabric is a reflective print that looks like foil. Science proved already that metal is a heat conductor. The metal heat insures that the warmth stays inside and reflects to the body, while the construction of the print allows (honeycomb) the humidity to get out. The new Metal Heat from Garneau for 21-22 is noiseless and will be part of several styles in its Nordic and fall cycling collections.



METAL HEAT

harness

PATENT PENDING

contact ONESHUT BOA®

A single Boa® to fasten the whole harness

Revolutionary harness system offering simple and efficient operation and exceptional hold of the foot on any terrain. Thanks to Boa® technology, the harness securely cinches all around the foot with just a twist of the knob. To pull free, simply lift the push button and the system opens, allowing the foot to slip out easily.

contact TREK BOA®

Single Boa®, large volume and padded for multi-day treks

Longer treks require the same snug fit and ease of adjustability on the trail assured by the Boa® closure, but the comfort procured by the added padding keeps your mind on the trail and distance to cover. Geometry designed for light to heavy insulated boots.

contact SPRINT BOA®

A Boa® harness sized for running shoes

Our definition for Boa®: ease of use and tremendous foot stability in our lightest package. Geometry designed for running wear and not bootwear.

contact TRAD

Reliable all-terrain dual strap harness

A 2-strap buckle system enables distinct front-mid foot snugness. Also ideal for working tasks where frequent hands-free foot insertion and removal is important (loggers, trappers, surveyors, farmhands) and is accomplished by setting the ratchets.

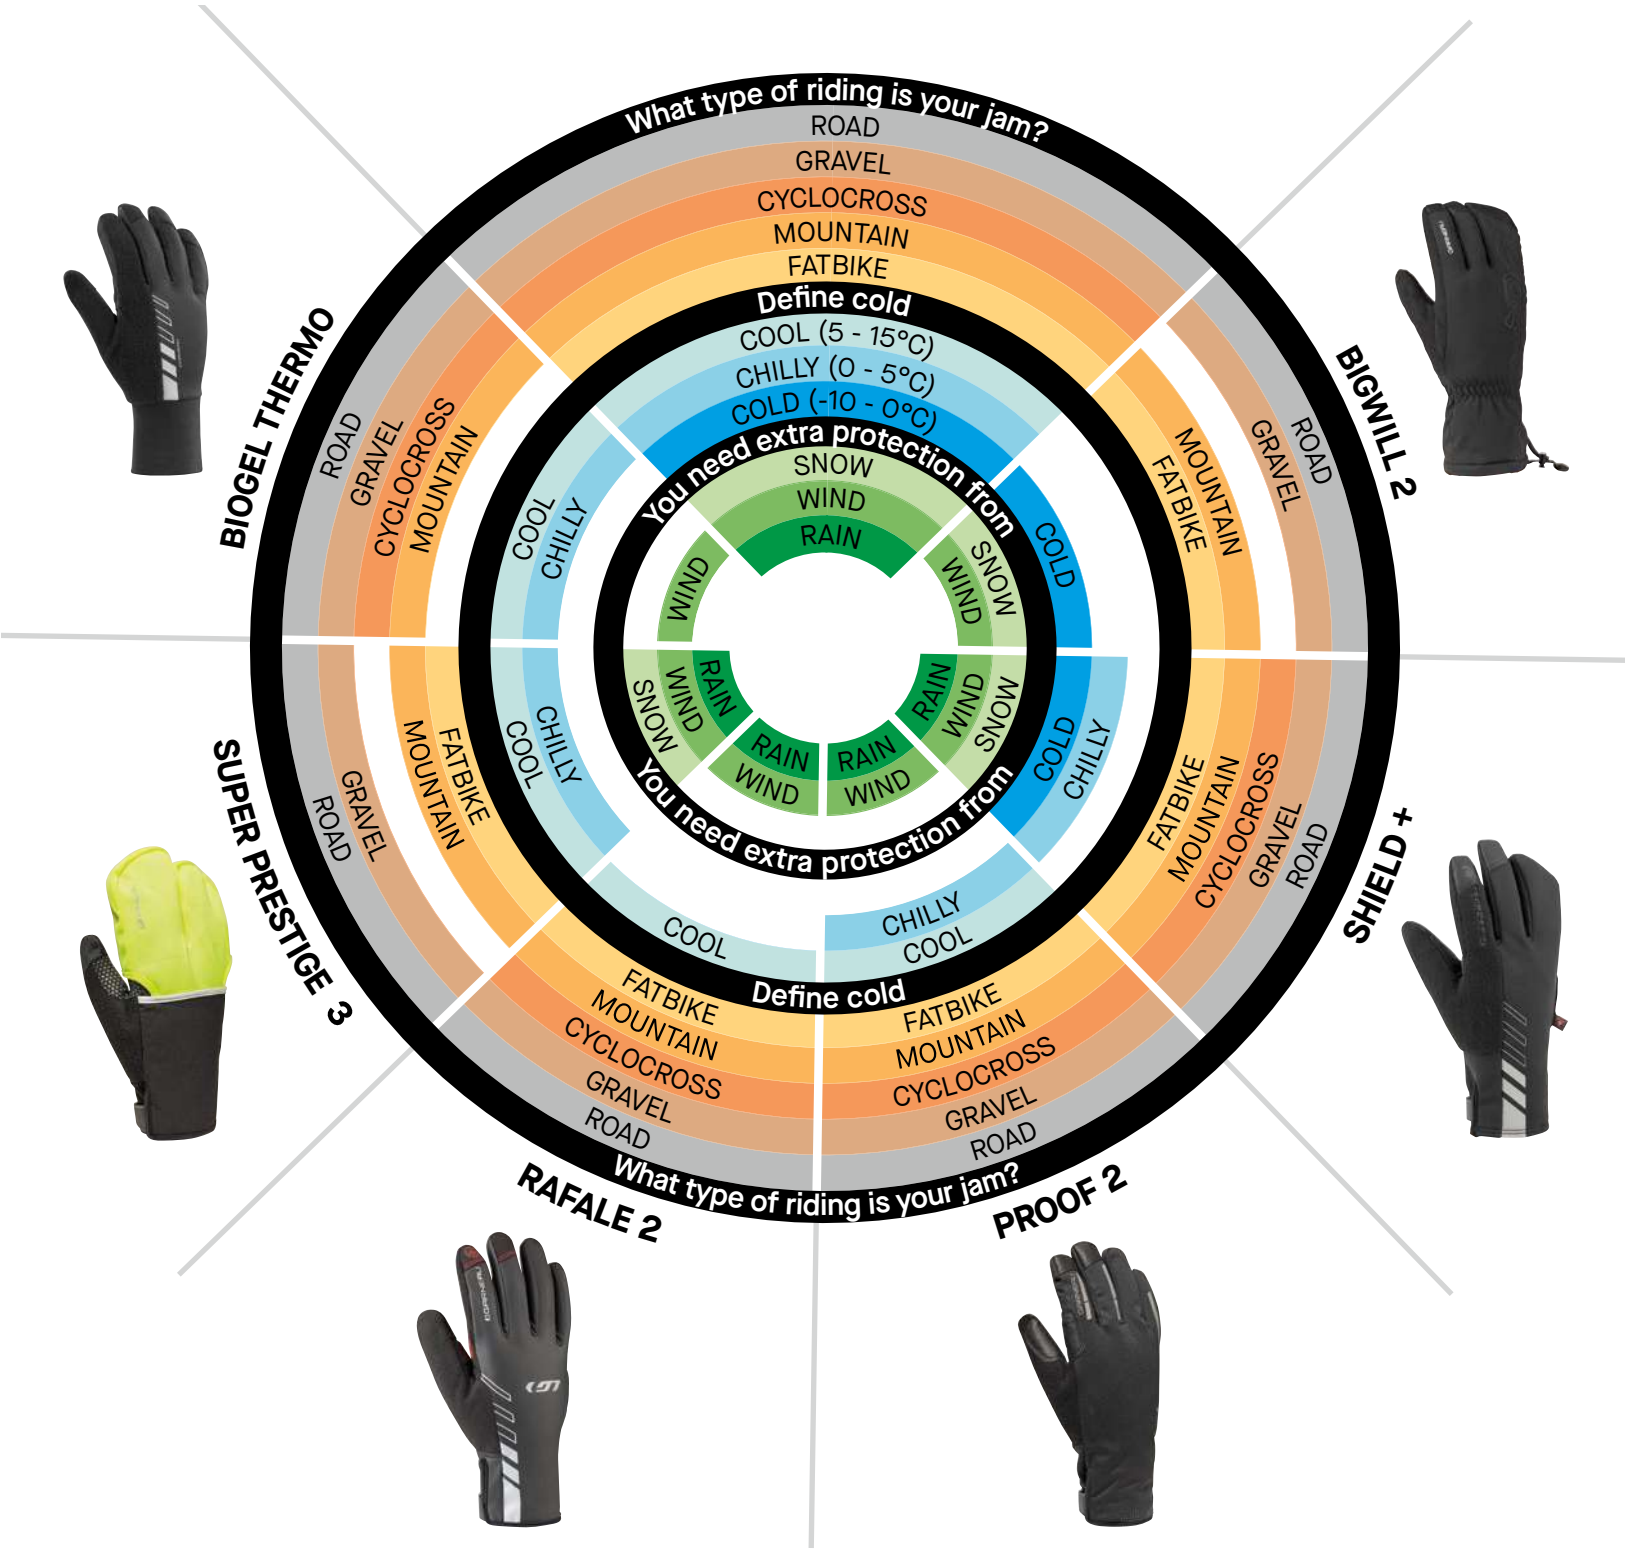
cycling gloves

At Garneau, we design products for all applications, but we also understand that figuring out which to buy is like spinning your wheels. So we created this handy-dandy little guide to help you pick the right gloves for riding this winter.



cycling gloves

Bigwill 2
1482293 / S-XXL

- **Upper hand:** FENCE2L; 200 g PrimaLoft® Gold Active+ insulation
- **Palm:** PU leather; ultra-thin and compression-resistant PrimaLoft® Aerogel insulation
- Elastic cord at hem
- Drytex® 8 lining
- Extra-long cuff
- Elastic at wrist

020

Super Prestige 3
1482307 / S-XXL

- **Upper hand:** Thermo-laminated spandex; 40 g 3M Thinsulate™ insulation
- **Palm:** Leather-like material; patented Ergo Air® X-Vent ventilation[1]; 40 g 3M insulation; strategically-placed silicone print; tactile areas
- Microfiber thumb to wipe sweat
- Reflective accents: high visibility
- Patented Biogel[2] progressive padding[3]
- Windproof and water repellent lobster mitts withTeflon® spandex finger cover

020

Rafale 2
1482273 / S-XXL

- **Upper hand:** Iso Lite WR
- **Palm:** GTEX synthetic leather; patented Ergo Air® X-Vent ventilation[1]; strategically-placed silicone print; tactile areas
- Patented Biogel[2] progressive padding[3]
- Wide wrist opening with hook-and-loop fastener
- Reflective highlights

020

W's Rafale 2
1482274 / S-L

- **Upper hand:** Iso Lite WR
- **Palm:** GTEX synthetic leather; patented Ergo Air® X-Vent ventilation[1]; strategically-placed silicone print; tactile areas
- Patented Biogel[2] progressive padding[3]
- Wide wrist opening with hook-and-loop fastener
- Reflective highlights

020

cycling gloves

Biogel Thermo
1482287 / S-XXL

- **Upper hand:** Drytex® Thermal DWR; microfiber index and thumb to wipe sweat
- **Palm:** GTEX synthetic leather; patented Ergo Air® X-Vent ventilation[1]; tactile areas
- Patented Biogel[2] progressive padding[3]
- Extended fitted elastic cuff
- Reflective highlights

020

W's Biogel Thermo
1482288 / S-L

- **Upper hand:** Drytex® Thermal DWR; microfiber index and thumb to wipe sweat
- **Palm:** GTEX synthetic leather; patented Ergo Air® X-Vent ventilation[1]; tactile areas
- Patented Biogel[2] progressive padding[3]
- Extended fitted elastic cuff
- Reflective highlights

020

Gel Attack
1482323 NEW / XS-XL

- **Upper hand:** Origin softshell; Drytex® Thermal DWR Laminated with fleece for warmth
- **Palm:** Amara palm WR. Patented Ergo Air X-Vent ventilation
- Tactile areas on fort and middle fingers
- 3mm GEL padding
- Reflective highlights

020

Edge Glove
1482297 / S-L

- **Upper hand:** Drytex® Thermal DWR
- **Palm:** Drytex® Thermal DWR; strategically-placed silicone print; tactile areas
- Extra-long and fitted cuff
- Lightweight glove
- Can also be used as a liner
- Snap button keeps gloves together

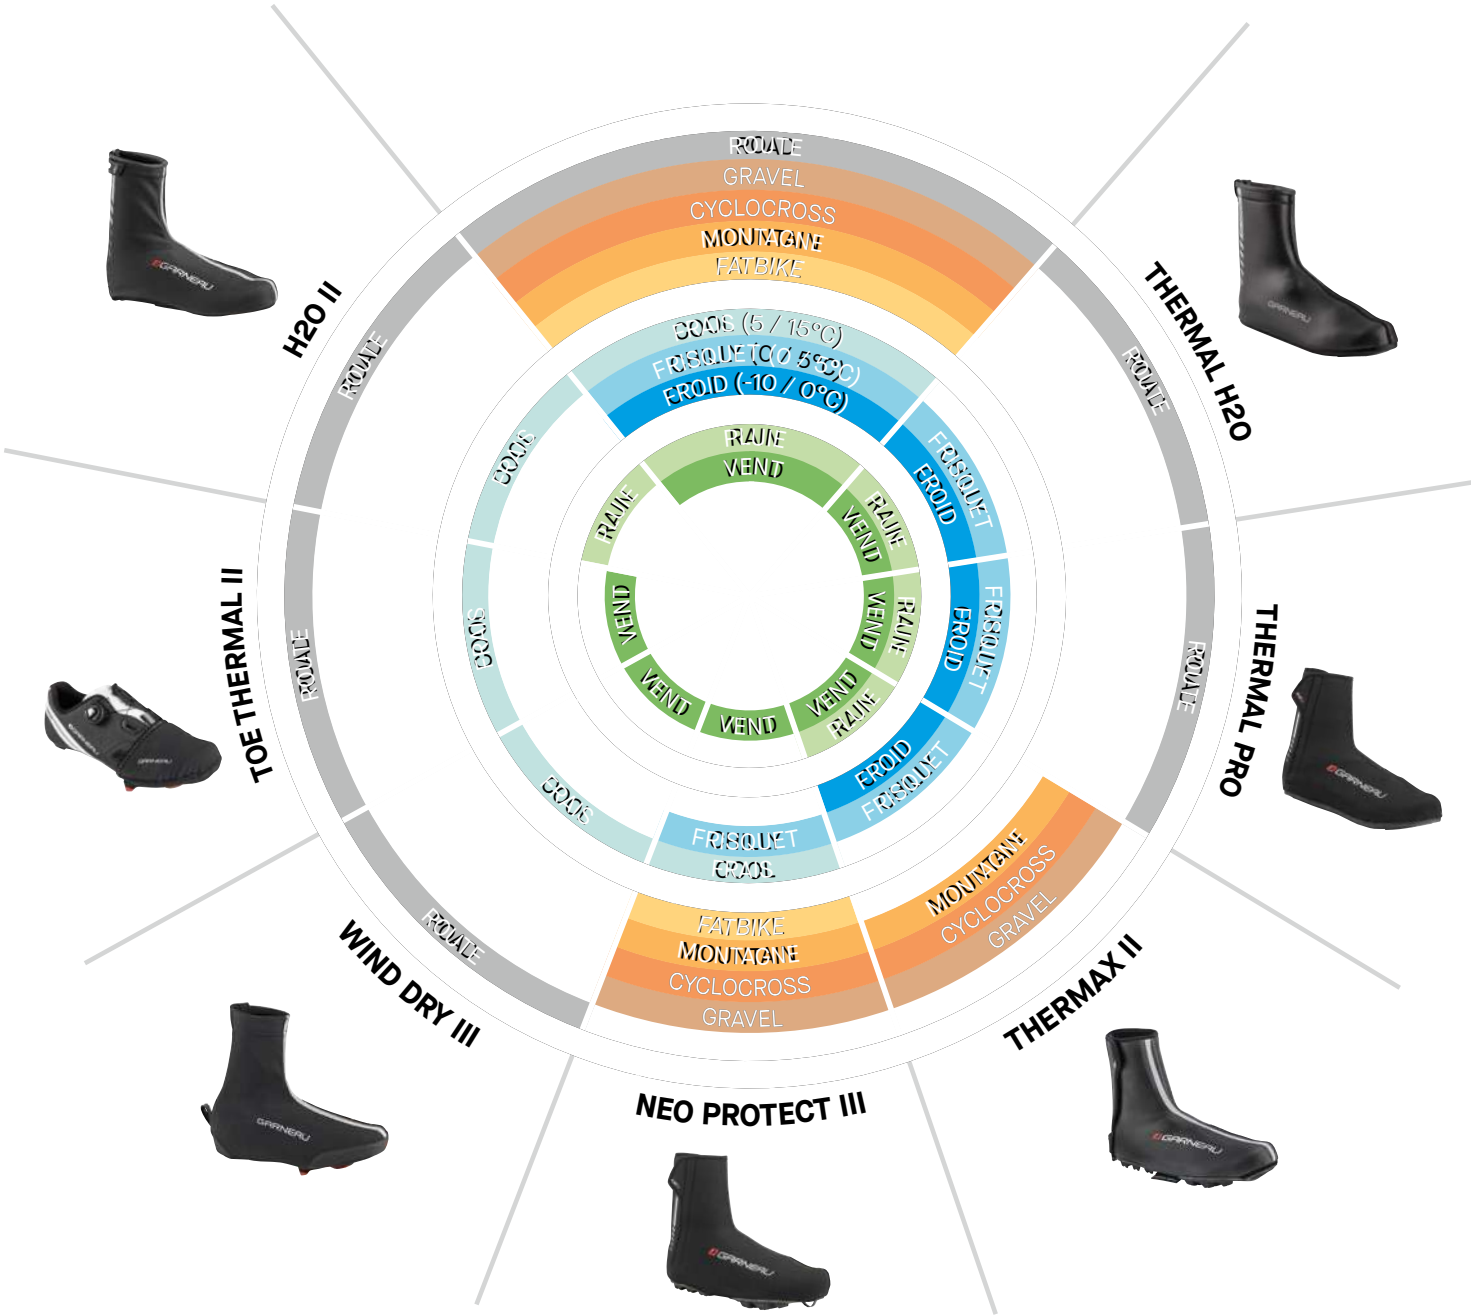
shoe covers

At Garneau, we design products for all applications, but we also understand that figuring out which to buy is like spinning your wheels. So we created this handy-dandy little guide to help you pick the right shoe covers for riding this winter.



shoe covers

Thermal H_2O
1083173 / S-XL

- Seam-sealed 3 mm super stretch neoprene laminated with fleece
- Rubber sole with cutting guide for cleats
- Seam-sealed zipper for all weather conditions
- Reflective highlights
- Recommended for road shoes
- 6,3 oz/178 g (medium)

020

Thermal Pro
1083168 / S-XL

- Seam-sealed 2 mm neoprene laminated with fleece
- Rubber sole with cutting guide for cleats
- Wide side hook-and-loop fastener with puller
- Reflective highlights
- Recommended for road shoes
- 5.4 oz/154 g (medium)

020

Thermax II
1083165 / S-XL

- Seam-sealed 3 mm super stretch neoprene laminated with fleece
- Reinforced rubber under opening with hook-and-loop strap
- Hook-and-loop fastener with safety puller
- Reflective highlights
- Recommended for MTB and road shoes
- 4.10 oz/116 g (medium)

020

Neo Protect III
1083167 / S-XXL

- Seam-sealed 2 mm neoprene laminated with spandex
- Neoprene under opening reinforced with Hypalon
- Wide side hook-and-loop fastener with puller
- Reflective highlights
- Recommended for MTB and road shoes
- 2.5 oz/72 g (medium)

020

shoe covers

Wind Dry III
1083179 / S-XL

- **ENERFLOW**
- Silicone elastic at ankle
- PU sole reinforced with rubber and Kevlar
- Zipper with protector
- Reflective highlights
- Recommended for road shoes
- 2.12 oz/60 g (medium)

020

Toe Thermal II
1083178 / S/M-L/XL

- **ENERFLOW**
- Woven strap
- 3 mm anti-slip neoprene
- Reflective highlights
- Recommended for road shoes
- 1.98 oz/56 g (small/medium)

020

H_2O II
1083164 / S-XL

- **ISO LITE WR fleece**
- Seam-sealed
- Neoprene cuff
- 2 openings with textured neoprene and reinforced rubber
- Sealed zipper with protector
- Reflective highlights
- Recommended for road shoes
- 2.4 oz/69 g (medium)

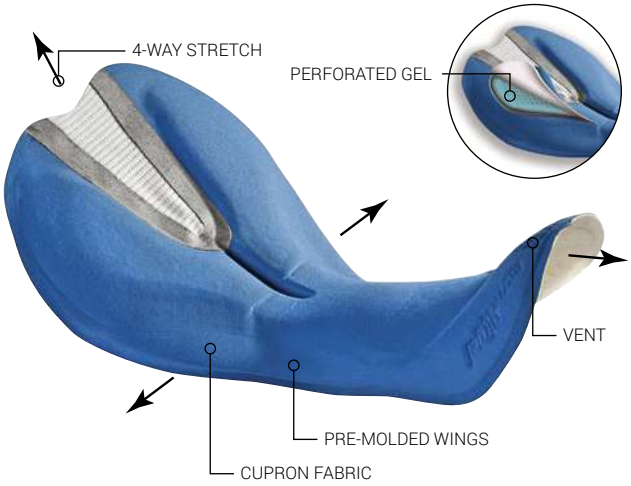
MOTION airgel



WOMEN

TOP SHEET
- Made with CUPRON fabric: The copper content of CUPRON fabric helps reduce irritation to the skin, provides antimicrobial properties, can help promote wound healing and provides anti-allergen properties. Long-lasting effect throughout the life of the product

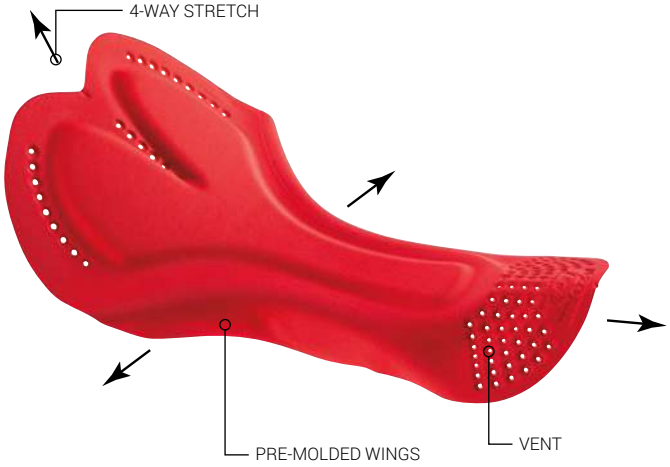
CONSTRUCTION
- Perforated gel inserts offer comfort and breathability
- Multi-thickness perforated high-density foam for better moisture evacuation
- Vents at the front help maintain breathability
- Central channel shaped to relieve pressure from the urethra (men only)
- A deep slit at the back is bridged by vented mesh to allow for multidirectional motion and amazing comfort
- Developed with B.E.M. (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights from one area to the other, resulting in a smooth transition without pinching points to eliminate chafing
- Louis Garneau patented ergonomic shape
- Patents : U.S. #6,393,618 ; Can. #2,349,801
- International patent pending

PATENTED

Beveled Edge Molding

High-density perforated memory foam and gel

AIRZONE2



WOMEN

TOP SHEET
- Fabric treated with an antibacterial solution to fight the effects of retained moisture, which can increase the growth of bacteria

CONSTRUCTION
- Developed with B.E.M. (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights at the edge of the foam, resulting in a smooth transition without pinching points or chafing
- Perforated vents maintain breathability without sacrificing comfort
- The foam and fabric used for this chamois maximize moisture wicking
- Chamois conforms ergonomically to the human body
- Pre-molded wings with a progressive slope shape for a superior, ergonomic fit
- 4-way stretch maximizes fit and motion
- Seamless construction
- Thinner perineal area relieves pressure (men only)
- Patents: U.S. #6,393,618 ; Can. #2,349,801

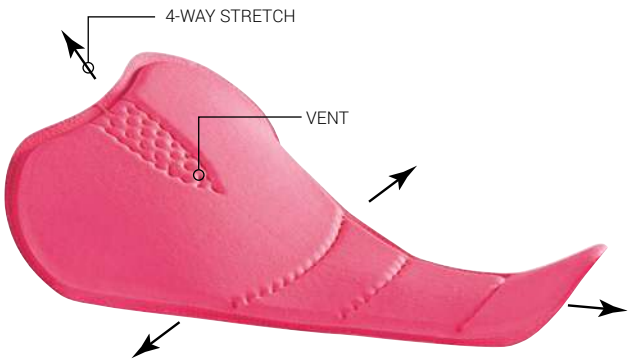
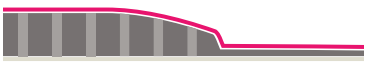
SLIM flex



TOP SHEET
- Fabric treated with an antibacterial solution to fight the effects of retained moisture, which can increase the growth of bacteriay

CONSTRUCTION
- Anatomic fit padding designed for the recreational cyclist in a minimalist shape that offers great comfort
- Minimal thickness for maximum verstility in fitness activities
- High-density foam for a good support
- 4-way stretch provides a better fit while riding
- Seamless construction eliminates pinching points and chafing



High-density perforated foam

AIRFIT MESH

- The semi-opaque structure and lightness of the mesh provide comfort, flexibility and excellent moisture control
- 4-way stretch light knit : 95% polyester, 5% spandex
- 110 g/m², 3.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

BORATEX

- Designed to protect from winter conditions
- 2-ply fabric with a 75 x 100 denier herringbone weave construction that provides great ease of movement, softness and good abrasion resistance
- The membrane forms a barrier against water and wind while maintaining the breathability of the garment
- Its hydrophobic properties push the moisture away, keeping your body dry
- DWR (Durable Water Repellent)
- Weave: 100% polyester
- Inner membrane: 100% polyurethane
- 152 g/m², 4.5 oz/yd²

Dexfil insulation

- Insulation made with a multi-denier filament and engineered for superior warmth and softness
- Fibers form tiny air pockets that trap body heat and keep the cold out
- Insulation: 100% polyester

DIAMONDAIR 2.0

- Diamond-shaped 40-denier ripstop construction enhances tear resistance
- Light yet abrasion-resistant, breathable and windproof fabric
- DWR (Durable Water Repellent) finish protects from the elements
- Light weave: 100% polyester
- 85 g/m², 2.5 oz/yd²

DRYTEX® 1001

- Designed for pros, this lightweight base layer fabric is very efficient when worn directly on the skin
- Perforations create a layer of air that prevents the first and second layers from sticking together. This layer of air retains body heat and keeps you dry in warmer conditions
- Treatment that enhances moisture wicking for maximum comfort
- The use of microfiber enhances comfort on skin contact
- Very light 4-way stretch knit mesh: 95% polyester, 5% spandex
- 90 g/m², 2.9 oz/yd²

® Louis Garneau

DRYTEX® 2002

- Permanent NANO-SILVER technology offers antibacterial and antiodor properties
- Made of a hollow fiber construction, it is fast-drying, optimizes moisture evacuation and helps control body temperature
- 40-denier 4-way stretch knit: 92% polyester, 8% spandex
- 150 g/m², 4.4 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

® Louis Garneau

DRYTEX® 2004

- Lightweight knit with the natural look and feel of cotton and all the technical properties of polyester
- Odor-free properties enhanced by an antibacterial treatment
- 4-way stretch knit: 94% polyester, 6% spandex
- 180 g/m², 5.3 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

DRYTEX® 4000

- Brushed on both sides, it creates a thick insulating layer of air to retain body heat
- 3M wicking finish that enhances moisture wicking for maximum comfort
- The use of microfiber enhances comfort
- Mechanical stretch knit: 100% polyester microfiber
- 175 g/m², 5 oz/yd²

®Louis Garneau

DRYTEX® 6001 NOUVEAU NEW

- Special dual-knit construction to impart pilling resistance strength, insulation & moisture management properties to pursue winter activities.
- Its spandex content provides shape recovery & comfort.
- HeiQ® sustainable & durable odor control treatment.
- Bluesign and OEKO-TEX approved.
- Technical fabric which can be worn as a first layer (Zone 1 and/or Zone 2) in the TRIZONE SYSTEM.
- Knit: 42% nylon + 45% polyester + 13% spandex
- 235g/m², 6.93 oz/yd²

DRYTEX® MESH

- Mesh construction fabric with large semi-perforated inner cells to improve breathability and moisture wicking
- Brushed on one side to improve body heat retention
- Does not form lint
- 2-way mechanical stretch knit: 100% polyester
- 140 g/m², 4.1 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

DRYTEX® THERMAL

- Stretch diamond terry jacquard
- Brushed inner face with a grid construction that provides airflow and thermoregulation
- Its wicking finish enhances moisture wicking for maximum comfort
- This fabric has a UPF/SPF 50
- 4-way mechanical stretch knit: 100% polyester
- 210 g/m², 6.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

DRYTEX® THERMAL climate

- Stretch diamond terry jacquard with DWR treatment for extra climate protection
- Brushed inner face with a grid construction that provides airflow and thermoregulation
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 92% polyester, 8% spandex
- 210 g/m², 6.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surface

ENDUREXX

- Stretch fabric that perfectly molds the curves of the body to provide maximum muscle compression and excellent support, thus helping reduce fatigue and increase resistance
- Chlorine resistance
- Soft-to-the-touch texture for more comfort
- Product developed to perfectly meet all your training needs
- This fabric has a UPF/SPF 50
- 4-way stretch matte knit: 80% nylon, 20% XTRA LIFE LYCRA® fiber
- 190 g/m², 5.6 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Enerball

- Synthetic alternative to down
- Compressive, fluffy and soft ball-type insulation that traps air to deliver warmth and breathability as well as offering great freedom of movement
- Easy to care for and quick-drying
- Insulation: 100% polyester

Enerflow

- Nylon spandex multi-function double weave brushed back softshell offering breathability, wind and abrasion resistance, quick drying and great ease of movement
- Brushed inner face improves body heat retention
- Non-fluorinated DWR (Durable Water Repellent) finish provides efficient protection from water
- 4-way stretch weave: 92% nylon, 8% spandex
- 320 g/m², 9.4 oz/yd²

Extenz3L

- 3-ply fabric constructed by combining 30-denier and 20-denier knits to offer lightness and protection from the elements
- DWR (Durable Water Repellent) finish on fabric surface
- Made with a breathable polyurethane membrane that allows for moisture wicking and protection from the elements thanks to its waterproof and windproof properties
- Merging of two fabrics for greater stretchability
- Mechanical stretch knit: 100% polyester
- Membrane: 100% polyurethane
- 160 g/m², 4.7 oz/yd²
- Very good impermeability: 10,000 mm
- Very good breathability: 10,000 g/m²/24 h

EVA

- Waterproof EVA resin membrane provides maximum protection from the elements
- Contains neither cadmium nor lead, unlike PVC, making its production and use more user- and eco-friendly
- Membrane: 100% ethylene vinyl acetate

FENCE2L

- Light 2-ply softshell with a woven mesh face construction that allows the membrane fully perform in terms of wind protection, breathability and waterproones
- The use of a mecanical stretch woven face also provides abasion resistance
- DWR (Durable Water Repellent) treatment on the fabric surface allows water to pearl
- Mechanical stretch weave: 100% polyester
- Membrane: 100% polyurethane
- 77 g/m², 2.3 oz/yd²
- Very good impermeability: 20,000 mm
- Very good breathability: 25,000 g/m²/24 h

Harbortec

- 2-ply fabric designed to protect from harsh winter conditions
- High density 65-denier tight twill weave construction provides this with fabric suppleness and abrasion resistance
- The membrane forms a barrier against water and wind while maintaining the breathability of the garment
- Its hydrophobic properties push the moisture away, keeping your body dry
- DWR (Durable Water Repellent)
- Weave: 100% polyester
- Inner membrane: 100% polyurethane
- 138 g/m², 4.07 oz/yd²

HEATMAXX

- Opaque construction with a brushed back to improve body heat retention
- This fabric has a UPF/SPF 50
- Improvement: Addition of a DRW (Durable Water Repellent) finish for improved protection from the elements*
- 4-way stretch knit: 86% nylon, 14% spandex
- 250 g/m², 7.4 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

* Some finished goods may have a DWR finish. Please refer to style description.

IceTek / icefil

- The surface is treated with Icefil, a xylitol-based treatment that absorbs body heat and transforms sweat into a cooling agent
- Fine-gauged construction results in an opaque, ultra light fabric
- Excellent stretchability thanks to the use of spandex
- Very light and soft to increase comfort
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 92% polyester, 8% spandex
- 144 g/m², 4.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Jacquard High Peak NOUVEAU NEW

- Jacquard fabric built with two types of ultra-fine gauge nylon yarns to create a subtle texture and a tone-on-tone effect on the fabric design
- The clear PU coating and non-fluorinated DWR (Durable Water Repellent) finish provide efficient protection, allowing water to pearl on the surface of the fabric
- Light weave: 100% nylon
- 74 g/m², 2.2 oz/yd²

Light MESH AIRDRY®

- Small inner-cell construction enhances airflow and moisture wicking
- Light 2-way mechanical stretch knit: 100% polyester microfiber
- 120 g/m², 3.5 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

® Louis Garneau

Lightsens

- Stretchable fabric with a polyester multi-filament construction contributing to its softness and comfort
- The use of spandex maintains good stretchability and shape recovery
- Very light 4-way stretch knit: 89% polyester, 11% spandex
- 130 g/m², 3.8 oz/yd²

Light Wind Pro® POLARTEC®

- This fleece spans an incredibly wide range of conditions; it performs as both outerwear and insulation and offers exceptional durability
- Proprietary yarns and a very tight construction greatly reduce the effects of windchill
- Blocks the wind four times more than traditional fleece
- The Durable Water Repellent outer surface sheds rain and snow
- Brushed inner surface efficiently traps air and provides a high warmth-to-weight ratio
- Inner and outer surfaces are finished for maximum durability and pill-free performance. They retain their insulating ability and original appearance after repeated use and laundering
- Because it is not a laminate, Polartec® Wind Pro® is highly breathable, maintaining 85% of the breathability of traditional fleece to help prevent overheating
- This fabric has a UPF/SPF 50+
- 4-way stretch knit: 58% nylon, 27% polyester, 15% spandex
- 214 g/m², 6.3 oz/yd²

MATRIX 2.0

- Fabric specifically constructed with different knit zones to combine breathability with protection
- High-precision knitting allows a product both thin and very stretchable
- This fabric has a UPF/SPF 50
- 4-way stretch knit : 77% nylon, 13% polyester, 10% spandex
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

megaHeat RX

- 210T lining with Mega Heat RX body heat reflective technology
- Special film print reflects body heat to retain warmth
- Weave: 100% polyester
- 78 g/m², 2.3 oz/yd²

Microshell NOUVEAU NEW

- 2-ply fabric designed to protect from winter conditions
- Extra fine gauge construction that provides this fabric with suppleness, softness and lightness
- Non-fluorinated DWR (Durable Water Repellent) finish provides efficient protection, allowing water to pearl on the surface of the fabric
- Weave: 100% polyester
- Membrane: 100% polyurethane
- 100 g/m², 3 oz/yd²
- Impermeability: 5,000 mm
- Breathability: 5,000 g/m²/24 h

MICROMESH

- Extremely well-ventilated mesh knit that provides excellent ventilation and moisture wicking properties
- Knit: 100% polyester
- 70 g/m², 2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Microzone® NOUVEAU NEW

- Lightweight and resistant, this fabric is an excellent breathable windbreaker
- Non-fluorinated DWR (Durable Water Repellent) finish provides efficient protection, allowing water to pearl on the surface of the fabric
- Weave: 100% polyester
- 109 g/m², 3.2 oz/yd²

Mistral

- Nylon spandex multi-function double weave softshell offering breathability, wind and abrasion resistance, quick drying and great ease of movement
- Non-fluorinated DWR (Durable Water Repellent) finish provides efficient protection from water
- 4-way stretch weave: 95% nylon, 5% spandex
- 287 g/m², 8.5 oz/yd²

Plush Fleece

- Incredibly soft texturized high-pile fleece that procures warmth and softness
- Knit: 100% polyester
- 160 g/m², 4.71 oz/yd²

POWER + LYCRA® FIBER / LYCRA SPORT

- This product contains more LYCRA® fiber than basic fabrics for full stretchability and shape recovery
- Compressive properties maximize muscular performance
- Helps favor blood circulation in the muscles which, during long rides, contributes to better performance and helps increase resistance to fatigue
- Absorbs and wicks moisture
- Power + LYCRA® fiber clothing is designed to fit muscle shape and provide maximum support to muscular fiber - Powered by LYCRA® SPORT ENERGY fabric
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 80% nylon, 20% LYCRA® fiber - Powered by LYCRA® SPORT ENERGY fabric
- 267 g/m², 7.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

POWER MESH

- Opaque mesh construction provides extreme breathability
- Incomparable comfort and flexibility thanks to its spandex content that reduces chafing
- Dries very quickly
- 4-way stretch knit: 80% polyester, 20% spandex
- 177 g/m², 5.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

quantum

- Embossed matte nylon spandex knit
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 72% nylon, 28% spandex
- 230 g/m², 6.8 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Raw Fleece NOU NEW

- Polyester thermal brushed knit fabric
- Its lofty structure creates thermal air pockets to retain warmth with still allowing optimal breathability
- Knit: 100% polyester
- 251 g/m², 7.4 oz/yd²

quantum2

- Embossed matte nylon-spandex knit
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 72% nylon, 28% spandex
- 230 g/m², 6.8 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

RHINO

- A 100-denier plain weave construction makes this fabric sturdy
- A DWR (Durable Water Repellent) treatment makes water pearl on the surface and increases resistance to stains
- This fabric has a UPF/SPF 50
- 2-way stretch weave: 94% polyester, 6% spandex
- 171 g/m², 5.04 oz/yd²

Signature MAT

- High performance spandex
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 83% nylon, 17% spandex
- 220 g/m², 6.5 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Square Mesh

- Grid-like mesh that provides ventilation, stretchability and quick drying
- 4-way stretch knit: 91% polyester, 9% spandex
- 130 g/m², 3.8 oz/yd²

SUPRAFILO2

- Perforated mesh construction increases airflow and provides great moisture management properties
- Very light and soft for greater comfort
- Spandex content provides stretchability for comfort and ease of movement
- Light 2-way stretch knit: 95% polyester, 5% spandex
- 100 g/m², 2.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Supra WindDry

- 3-ply softshell resulting from a combination of two knits for optimal elasticity that improves fit and comfort
- Its micro-perforated polyurethane membrane enhances moisture evacuation and protection from the elements
- DWR (Durable Water Repellent) treatment on the fabric surface allows water to pearl
- 4-way stretch 3-ply knit: 83% polyester, 9% polyurethane, 8% spandex
- 323 g/m², 9.5 oz/yd²
- Very good impermeability: 10,000 mm
- Very good breathability: 10,000 g/m²/24 h

Thermasoft NOU NEW

- Ultra-soft double-sided peachskin jersey fabric that retains body heat and provides very good moisture control
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 90% polyester, 10% spandex
- 165 g/m², 4.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

THERMASOFT 180

- Brushed knit that covers a variety of climate conditions
- Its spandex content ensures freedom of movement
- A hydrophobic treatment allows moisture to evacuate rapidly
- The brushed interior efficiently retains air and offers a high warmth-to-weight ratio
- The fabric retains its insulating ability and original appearance after repeated use and laundering
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 83 % polyester, 17 % spandex
- 180 g/m², 5.3 oz/y²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Vasco

- 2-ply fabric designed to protect against extreme winter conditions
- Its unique texture, due to its 300-denier chevron weave and brushed finish, gives it a natural wool effect for a technical result and urban styling with a DWR (Durable Water Repellent) finish
- Weave: 100% polyester, hydrophobic membrane
- 190 g/m², 5.6 oz/yd²

VERTEXX

- Opaque construction with a brushed back to improve body heat retention
- This fabric has a UPF/SPF 50
- Improvement: Addition of a DRW (Durable Water Repellent) finish for improved protection from the elements*
- 4-way stretch knit: 90% polyester, 10% spandex
- 200 g/m², 5.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

* Some finished goods may have a DWR finish. Please refer to style description.

Zircon

- Interlock construction that provides good moisture-wicking properties
- This fabric has a UPF/SPF 50
- Mechanical stretch knit: 100% polyester
- 130 g/m², 3.8 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

SLIM FIT

Close-fitting garment designed to provide aerodynamics in a cycling position.

For a less compressive feel on the body, upsize.

STANDARD FIT

Garment that provides a close to the body fit without compressing.

RELAXED FIT

Roomier fit that provides a casual look and good range of movement.

HOW TO FIND YOUR SHOE SIZE

Place your heel along a wall and place an object (wooden block, dictionnairy, etc.) against your longest toe.

Measure the distance between the wall and the object. Measure both feet. The longest measure is the size to use.

The Garneau Standard Fit is C. If your foot is larger than standard (D fit and over), we recommend choosing a half-size larger than the size suggested on the chart. If you are purchasing shoes to wear mainly in fall/winter with thicker socks, we recommend measuring your feet with the socks you'll be wearing with the shoes.

SIZING CHART
