
USA / Fall **2019-2020**

GARNEAU®

"The year is 1983. I'm at a race in Europe, flying down this really steep hill. At this point in the race I was getting very tired and suddenly, this sign at the bottom of the hill appears out of nowhere letting me know a sharp turn is coming up. Thankfully, I looked up at just right moment. I was going so fast and the image of the sign was coming ever so closer, and it reminded me to slow down for the sharp turn, focus on my efforts, and finish the race as strong as possible. If I hadn't looked up at just the right time to see the sign, then who knows what would have happened. I could have gone into the turn too fast or missed it all together, either which would have resulted in a potential crash. The moment left a strong impression on me that's lasted forever. So, I decided to add it to my logo to always remind myself to stay focused and to keep moving. Back then the logo was a very square-shaped LG and adding the chevron also represented direction, speed, and it made the logo look more dynamic. So there you are, that's the origin of the chevron."
- Louis Garneau

THE CHEVRON HAS HAD MANY ITERATIONS OVER THE YEARS, WHICH IN AND OF ITSELF PROVES THE DYNAMICS OF THE BRAND: ALWAYS MOVING AND STAYING AHEAD OF THE CURVE.

PROTECTIVE & ENABLING

WE KNOW YOU VERY WELL. WHY? BECAUSE WE ARE YOU. WE'RE CUT FROM THE SAME CLOTH, YOU AND US. WE KNOW THE COURSE, THE TRACK, THE PATH, THE PAIN, THE DEAD OF WINTER THAT MAKES OUR LEGS FEEL LIKE LEAD AND OUR LUNGS FEEL LIKE CRYSTALS, AND WE SHARE THE SAME DREAM TO CONQUER OUR BARRIERS. COLD. WIND. RAIN. SNOW. THESE ARE THE BARRIERS WE FACE IN THE WINTER. THEY'RE NOT ONLY BARRIERS TO OUR PERFORMANCE, BUT ALSO TO OUR ENJOYMENT AND GENERAL STATE OF WELL-BEING. SURE, WE COULD SIT ON THE TRAINER ALL WINTER BUT WHAT GOOD DOES THAT DO THE MIND? THE KEY TO A GOOD WINTER SEASON IS TO ACTUALLY GET OUTSIDE. AFTER ALL, THERE IS NO BAD WEATHER... ONLY BAD CLOTHING, BAD ATTITUDES, AND BAD ASSES. OUR PERFORM LINE OF FALL APPAREL BREAKS THE TREND OF BAD CLOTHING THAT LEAVES YOU COLD, WET, AND MISERABLE. OUR PERFORM LINE PROTECTS YOU FROM WHAT SLOWS YOU DOWN AND ENABLES YOU TO GET OUTSIDE, SMELL THAT CRISP WINTER AIR, FACE THOSE FOUL WEATHER CONDITIONS, REACH YOUR GOALS, AND HAVE THE TIME OF YOUR LIFE. WE'VE TAKEN CARE OF THE CLOTHING PART; THE REST IS UP TO YOU!

33 QUESTIONS WITH CANADIAN NATIONAL CYCLOCROSS CHAMPION MICHAEL VAN DEN HAM

1. IF YOU HAD TO PICK JUST ONE TIRE WIDTH, WHAT WOULD IT BE?

33 mm, easy enough!

2. AND IF YOU HAD TO PICK ONE TIRE PRESSURE, WHAT WOULD IT BE?

23 psi, because it's good for everything (sort of).

3. WE KNOW BOTH OF THESE QUESTIONS COULD CHANGE BASED ON THE RACE CONDITIONS…WHAT'S YOUR FAVORITE CONDITIONS TO RACE IN?

I like it when it's muddy. My favorite courses are the heavy ones over in Europe.

4. WHAT MAKES CROSS RACING DIFFERENT FROM ROAD OR MTB?

We have fun. Easy!

5. WHAT INSPIRED YOU TO GET INTO RACING CROSS?

My brother, he is a former masters 35-45 national champion. At the university, when I was looking for something to do in the fall, that's where I took off.

6. WE WANT TO DIVE INTO MORE CROSS SPECIFIC QUESTIONS IN A MINUTE, BUT LET'S GET TO KNOW YOU A BIT FIRST. WHERE WERE YOU BORN?

Brandon, Manitoba.

7. WHAT'S YOUR FAVORITE CHILDHOOD MEMORY?

My family had a boat, so Sundays were lake days in the summer.

8. GROWING UP IN CANADA, WAS THERE A BEACH YOU'D EVER VISIT IN THE SUMMER?

There was a beach at the lake, where we'd go swimming all time.

9. WHAT WOULD YOU DO AS A KID TO KEEP YOURSELF BUSY DURING THE WINTER?

Snowmobiling, snowboarding behind the snowmobile because it's Manitoba and there are certainly no hills.

10. WHAT'S YOUR FAVORITE MOVIE?

We got a TV when I was 10 and even then, it was a 13" one, so I played a lot of NHL 2000 on the computer.

11. ARE YOU AN IPHONE OR ANDROID GUY?

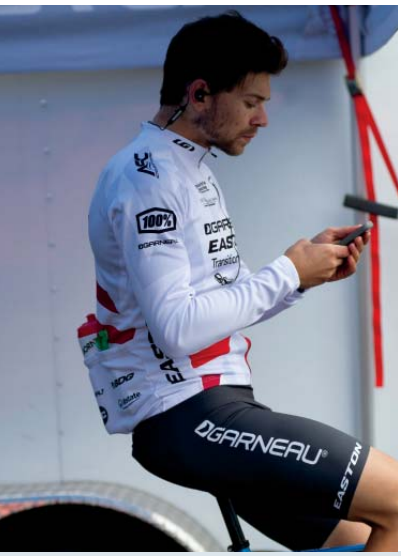
iPhone.

12. OK, WE'RE GETTING OFF TOPIC, WHAT DO YOU LOVE ABOUT THE SPECTATORS AT CROSS RACES?

Everyone in cross is encouraging in North America. I like that everyone is cheering for everyone.

13. WHAT'S THE MOST RIDICULOUS COSTUME YOU'VE EVER SEEN IN A CROSS RACE?

When someone dressed up their bike as a horse and themselves as a cowboy, or people with full-on dinosaur tails. Those are pretty good! The only one I have done was the wrestler, because you had to wear a pair of black bibs and that was it. Not very creative.



14. FOR THE UNEDUCATED, WHAT'S A HANDUP?

handup is when you are in the middle of the cross race and someone hands you a drink which you have to drink no matter what it is.

15. WHAT'S THE NASTIEST HANDUP YOU'VE EVER ACCEPTED?

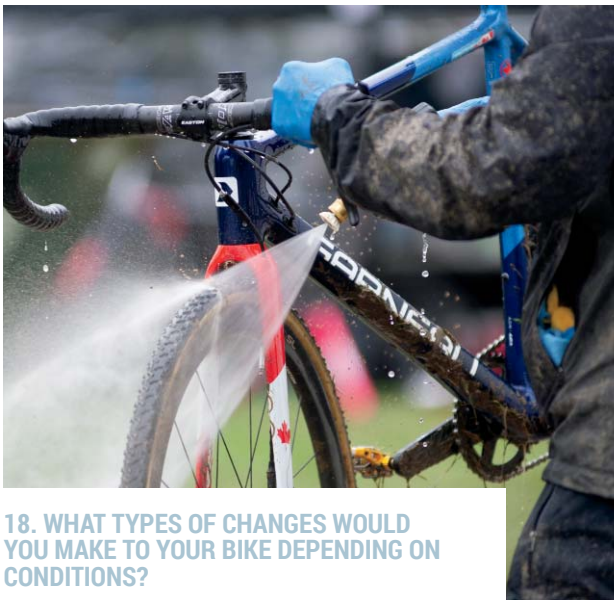
Tomato juice, chocolate milk or jelly filled donuts.

16. DO YOU THINK HANDUPS SHOULD BE ALLOWED IN PRO RACES?

I think so! No one thinks it's a performance advantage so why not.

17. WHAT'S YOUR GO-TO SETUP WHEN IT COMES TO YOUR BIKE?

Some mud tires, I run my bike low compared to most people so that you can move the bike underneath you. I've been on Garneau bikes for the last 4 years, I wouldn't know how to ride anything else at this point.



18. WHAT TYPES OF CHANGES WOULD YOU MAKE TO YOUR BIKE DEPENDING ON CONDITIONS?

To the bike setup, just tires.

19. CARBON, STEEL, OR ALUMINUM?

Carbon. Steel is cool overall but for race bikes, carbon.

20. WHAT'S YOUR WARM-UP ROUTINE?

I used to do about 30 minutes on course, pop on a trainer for 20 to 30 minutes with 6 to 8 minutes threshold.

21. WHAT'S YOUR FAVORITE CROSS-TRAINING ACTIVITY?

Going for a run on the mountain bike trails. I also enjoy cross country skiing and hiking.

22. WHAT ABOUT FOOD AND HYDRATION STRATEGY THE WEEK LEADING UP TO A RACE?

I absolutely try to keep it fairly clean leading up to the race. I've stopped drinking beer this season, which is a bit of a bummer for me – I love beer! On race day, simple carbs such as gluten-free pancakes, rice and eggs – pretty boring stuff unfortunately. Beers and bacon after.

23. WHAT'S YOUR STRATEGY DURING A RACE? ATTACK IMMEDIATELY OR SIT IN AND FEEL IT OUT?

I like riding hard right from the go.

24. DO YOU PEAK AT ANY CERTAIN POINT DURING THE RACE OR ARE YOU PRETTY CONSISTENT THROUGHOUT?

I definitely get better as the race goes on. My weakest point of the race is the start and as we get further on, I start improving and can finish pretty strong.

25. WHAT'S YOUR STRATEGY WHEN IT COMES TO GETTING ACROSS BARRIERS?

Depends on the barriers. I hop them if they are up to 35 cm and spaced apart, but anything higher or closer than that I will be off the bike running.

26. ARE THERE ANY OBSTACLES YOU THINK WOULD BE FUN TO ADD TO RACES THAT TRADITIONALLY HAVEN'T BEEN ON THE COURSE?

Last year in the European races they had Toyo as a sponsor and they had Toyo tire barriers, that were half submerged tires in the ground. It was good because it was a good sponsor interaction but also because occasionally people would get the bike tires stuck in between these tires and then had to lift them out. I thought it was pretty creative.

27. WHAT'S THE MOST BEAUTIFUL PLACE YOU'VE EVER RACED?

Gloucester, right on the ocean, giant rock – it's gorgeous there.

28. WHAT'S THE HARDEST RACE YOU'VE EVER HAD?

Last year in Volkenburg, the world championships. It was on top of what you call a mountain in Netherlands, and it was just insanely muddy. I've never ran so much before.

29. WHAT'S YOUR FAVORITE RECOVERY BEVERAGE?

A milkshake, absolutely.

30. WHAT SHOULD WE ALL DO TO GROW THE SPORT OF CROSS?

Youth programs, getting kids into the sport. It's an awesome sport so we need to show people that it exists and show more people what could be done out here.

31. WHAT'S THE GREATEST INNOVATION YOU'VE SEEN IN CROSS SINCE YOU'VE BEEN COMPETING?

Disk brakes have changed how you race a cross race.

32. WHAT ARE SOME INNOVATIONS YOU'D LIKE TO SEE IN THE SPORT?

There has been some talk about widening the UCI tire limit, but I'm in favor of keeping it at 33. Maybe I'm a little bit of a traditionalist, but I'm pretty happy with where things are at right now.

33. WHAT ARE YOU GOING TO DO TODAY AFTER WE LEAVE?

My parents are here, so probably have dinner with them. Tomorrow is PANAM, so basically prepare for that. After PANAM though, it's definitely burger, fries and milkshake – the whole classic American meal (I guess)!

WINTER BIKE

BY LINDSAY WARNER

After the greens, reds, and golds of foliage season fade and the tourists head back home, a small community in Northeastern Vermont starts battening down for the winter. Close as it is to the Canadian border, winter is cold and long up here, and the days are short. The hordes of mountain bikers ripping singletrack through Vermont's rooty, rugged green mountains disappear, leaving behind a quiet, cold landscape.

But locals know the only way to survive a Vermont winter is to get out in it, every single day. So when Ryan Thibault, founder of a Vermont-based mountain-biking community called MTBVT decided he didn't want to stop riding his mountain bike over the winter, he just… didn't. And when he called his friend Lil Ide, marketing and event manager at Kingdom Trails—one of the best destinations in the Northeast for mountain biking—and suggested they host a bike festival in the dead of the winter, she was all in.

That was in 2010. Hardly anyone knew what a fatbike was back then, never mind what conditions it was best suited to. But about 70 people showed up for an informal "Run What You Brung"-type celebration of winter cycling, complete with beers, food, and a bonfire. The trails were bulletproof-frozen, so it didn't matter that most people rode regular mountain bikes—but after seeing a handful of riders ripping around the trails on

"real" fatbikes, Thibault and Ide knew the festival had a future—and that they'd be seeing more of the sturdy, fat-tired bikes in years to come.

Today, the Winterbike Fatbike Festival at Kingdom Trails is one of many fatbiking festivals around the country. It didn't take cyclists in Vermont long to realize the potential of fatbikes to extend the biking season and to fill in the inevitable gaps between powder days (the best fatbiking days are typically the worst skiing days). Attendance numbers jumped from around 70 to as many as 500. And as more fatbikers started showing up in remote parts of Vermont to ride in all weathers, trail managers responded.

Kingdom Trails now grooms 25 miles of dedicated singletrack for winter use, providing a welcome alternative to riding multipurpose ski trails or snowmobile networks. Thibault and Ide have continued to tweak the formula for Winterbike; in addition to the amenities available year-round at Kingdom Trails—like its two trail-side bike shops (one of which sells hot coffee and local brews), an inn, a spa, and a coffee shop—local vendors also peddle local food and beers. A remote aid station offers up Cabot cheese, Vermont Smoke & Cure sausage, fresh bread, and maple treats from the on-site sugar house, as the festival typically falls in March when the sap is running. A yurt warming hut and bonfire keeps bikers warm, and various group rides, silly games, a tire pull, and a friendly fatbike race keep them returning each year. And just like the first year, everyone is welcome, no matter what kind of bike you show up with. But for the most fun, grab a demo and let 'er rip—the snow makes for a soft landing (mostly).

PEOPLE AND PLACES
ON THE GO
FLUID AND FASHIONABLE
FORWARD THINKING

WE THRIVE ON MOVEMENT. WHETHER IT'S OUR BODIES OR MINDS, BEING IN A STATE OF MOTION ENERGIZES US TO REACH FOR NEW HEIGHTS. NEVER ACCEPTING THE STATUS QUO, ALWAYS LEARNING, HEADING FROM THE BOARDROOM TO THE SPIN ROOM, FROM THE SCHOOL TO THE STORE, TO THE GYM, COMMUTING AROUND TOWN, AND THEN HITTING THE COUCH AT THE END OF THE DAY TO CATCH OUR BREATH, WE ARE THE MOVERS AND SHAKERS. PEOPLE AND PLACES MATTER TO US. CONNECTING TO OUR FRIENDS, FAMILY, AND THE PLACES AROUND US IS NOT OPTIONAL. IT'S A WAY OF LIFE. SURE, IT'S NOT FOR EVERYBODY, BUT IT'S FOR US. WE ARE THE CONNECTERS THAT MAKE THE WORLD GO ROUND.

3 TIPS TO MAKE YOU 3X SAFER ON THE BIKE

Let's cut straight to the point:

It's a fact, wearing hi viz clothing, adding lights to your bike, and complementing your garments with reflective elements can save your life. Not one or the other, but all three together.

Research from Clemson University in South Carolina has proven these three key elements give drivers 3X more reaction time to see you, slow down, and pass safely and courteously. It was such a good study, that the Wall Street Journal even did a story and a video on Clemson's findings.

Three tips to live by:

1 **Wear florescent colors on moving parts of the body** such as your shoes, socks, knee warmers, and wear a high visibility cycling jersey or jacket. As Dr. Tyrrell mentions from the study, "Humans are really good at recognizing other humans." Adding bright colors to moving parts of your body lets drivers recognize the body's motions and enables drivers to identify there is indeed a human being pedaling on the road. As for the high vis cycling jersey or jacket, it adds to the overall "visibility package" that enables you to be seen from farther away.

2 **Add lights to the front and read of your bike.** Not all lights are created equal, so be sure to add bright lights that can been seen from far away. One on the seatpost and one on the handlebars is a great start but add more if you can. For extra visibility add lights to your ankles, creating light that moves up and down, thus reinforcing to the driver there is a cyclist on the road. A word to the wise though: When running extremely bright headlights in the front, be sure to point them downward as not to blind oncoming drivers.

3 **Add reflective elements wherever you can.** They only work when light hits them, but they are extremely effective. Especially when paired with lights, and hi viz clothing on moving parts of the body. There are also reflective accessories you can find that strap to your ankles, and even reflective stickers you can add to your bike. With these three strategies in place, riding becomes much more safe and you can have a better piece of mind when heading out for your rides. While these are great fall and winter tips, we would also encourage you to follow this advice no matter the time of year. It always helps to be seen, even on the warmest and brightest of days.

Garneau provides gear for every type of riding and we have developed specific technologies for high visibility cycling apparel, reflective treatments, and also offer our own range of cycling lights.

SPINNING CLASS

Ahhhh, winter! The cold, snowy, rainy days of our lives when we reflect on bluebird summer days and rolling ribbonesque horizon lines that go on forever. The season may not be everyone's favorite, but thankfully we have indoor training to rescue us from the pumpkin spice abyss. Whether you're naturally keen on riding windoors or you view it as a necessary evil, having the right indoor gear will actually help you overcome the winter blues and keep your fitness alive, awake, and enthusiastic. From the gym to the garage, and from fall to spring, our best-in-class indoor shoes and moisture wicking performance apparel keep the wheels spinning while keeping your mind and body fresh.

ACTIFLY

W'S ACTIFLY

The main difference between outdoor and indoor cycling is the amount of heat and sweat generated while pedaling. That's why the main focus of the Actifly is breathability and moisture wicking. Multiple air channels are located in the outsole for constant airflow. Moisture evacuation happens at the shoe's upper, which is covered with the same mesh fabric used on Garneau's world-renowned triathlon shoes. These were made to dry out fast for racers coming to the bike from the swim, so we applied this winning formula here. We've also used our most breathable insole to maximize the Actifly's airflow inside the shoe. And, the inner lining and ventilated insoles are antibacterial to reduce additional moisture and combat smelly post-workout shoes.

Unlike the typical squishy running shoe which can lead to hot spots and poor biomechanics on the bike, the Actifly is built on a stiff nylon/fiberglass ventilated outsole. This gives the athlete a stable and efficient platform so that pedal stroke is optimized and the foot is comfortable and secure.

5MOTION

Beveled Edge Molding

High-density perforated memory foam

WOMEN

TOP SHEET

- The top sheet contains carbon fibers and has high-tech bacteriostatic properties

CONSTRUCTION

- The innovative 5Motion design combines 3D preshaped wings and a deep slit at the back bridged by vented mesh to allow for multidirectional motion and amazing comfort
- Developed with B.E.M. (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights from one area to the other, resulting in a smooth transition without pinching points to eliminate chafing. Mesh area at the front adapts to the body for increased comfort and moisture wicking
- Multi-thickness perforated high-density foam for better moisture evacuation
- Central channel shaped to relieve pressure from the urethra (men only)
- Louis Garneau patented ergonomic shape
- Patents : U.S. #6,393,618 ; Can. #2,349,801
- Other international patents pending

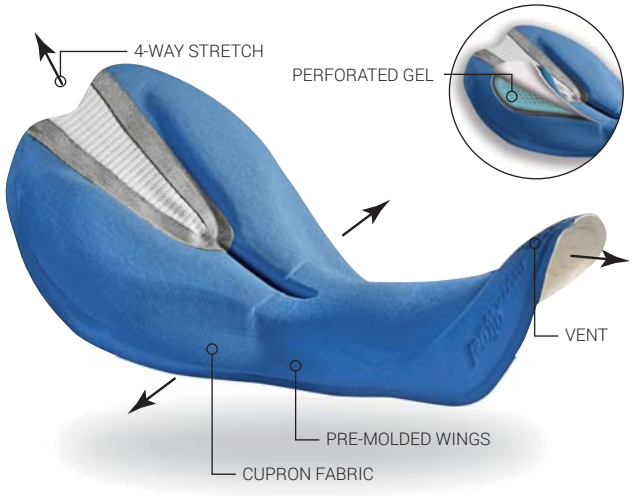
MEN

WOMEN

PATENTED

ARTICULATED CHAMOIS

MOTION airgel



Beveled Edge Molding

High-density perforated memory foam and gel

WOMEN

TOP SHEET

- Made with CUPRON fabric: The copper content of CUPRON fabric helps reduce irritation to the skin, provides antimicrobial properties, can help promote wound healing and provides anti-allergen properties. Long-lasting effect throughout the life of the product

CONSTRUCTION

- Perforated gel inserts offer comfort and breathability
- Multi-thickness perforated high-density foam for better moisture evacuation
- Vents at the front help maintain breathability
- Central channel shaped to relieve pressure from the urethra (men only)
- A deep slit at the back is bridged by vented mesh to allow for multidirectional motion and amazing comfort
- Developed with B.E.M. (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights from one area to the other, resulting in a smooth transition without pinching points to eliminate chafing

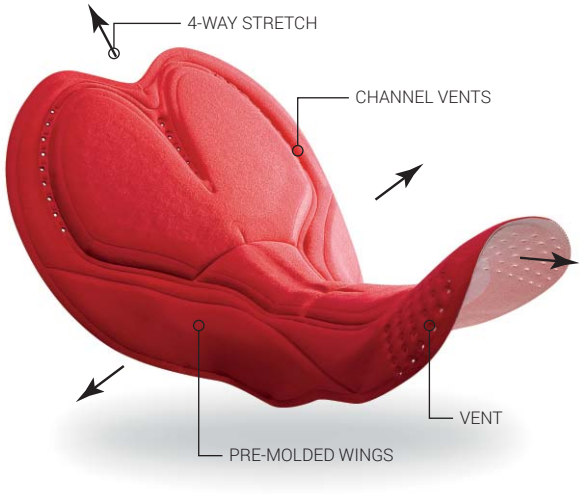
AIRZONE



Beveled Edge Molding

High-density perforated memory foam

WOMEN

TOP SHEET

- Fabric treated with an antibacterial solution to fight the effects of retained moisture, which can increase the growth of bacteria

CONSTRUCTION

- Developed with B.E.M. (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights at the edge of the foam, resulting in a smooth transition, without pinching points or chafing
- Vents are reduced in size but doubled in number to maintain breathability without sacrificing comfort
- The foam and fabric used for this chamois maximize moisture wicking
- Chamois conforms ergonomically to the human body
- Pre-molded wings for a superior, ergonomic fit
- 4-way stretch maximizes fit and motion
- Seamless construction
- Thinner perineal area relieves pressure (men only)
- Patents : U.S. #6,393,618 ; Can. #2,349,801

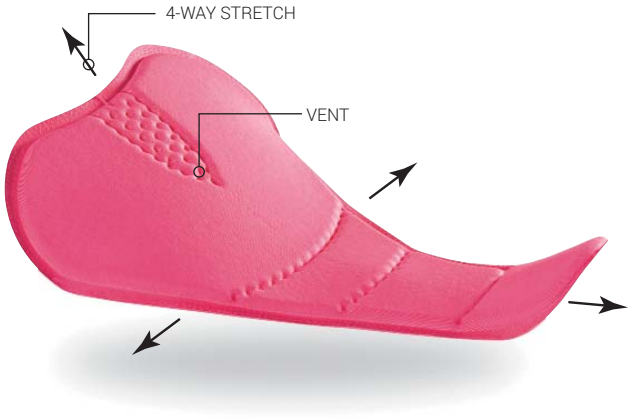
SLIM *flex*



High-density perforated foam

TOP SHEET

- Fabric treated with an antibacterial solution to fight the effects of retained moisture, which can increase the growth of bacteriay

CONSTRUCTION

- Anatomic fit padding designed for the recreational cyclist in a minimalist shape that offers great comfort
- Minimal thickness for maximum verstility in fitness activities
- High-density foam for a good support
- 4-way stretch provides a better fit while riding
- Seamless construction eliminates pinching points and chafing

WOMEN

AIRFIT 2.0

- The natural look and soft feel of cotton with all the technical properties of polyester
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 94% polyester, 6% spandex
- 180 g/m², 5.3 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

AIRFIT MESH

- The semi-opaque structure and lightness of the mesh provide comfort, flexibility and excellent moisture control
- 4-way stretch light knit : 95% polyester, 5% spandex
- 110 g/m², 3.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

COVERTEC

- Tight 70-denier mechanical stretch construction that offers windbreaking properties and provides ease of movement
- Polyurethane membrane that offers good protection from the elements
- A DWR (Durable Water Repellent) treatment makes water pearl on the surface and increases resistance to stains
- This fabric has a UPF/SPF 50
- 4-way mechanical stretch weave: 100% polyester
- Membrane: 100% polyurethane
- 171 g/m², 5.04 oz/yd²

DIAMONDAIR 2.0

- Diamond-shaped 40-denier ripstop construction enhances tear resistance
- Light yet abrasion-resistant, breathable and windproof fabric
- DWR (Durable Water Repellent) finish protects from the elements
- Light weave: 100% polyester
- 85 g/m², 2.5 oz/yd²

DRYTEX® 1001

- Designed for pros, this lightweight base layer fabric is very efficient when worn directly on the skin
- Perforations create a layer of air that prevents the first and second layers from sticking together. This layer of air retains body heat and keeps you dry in warmer conditions
- Treatment that enhances moisture wicking for maximum comfort
- The use of microfiber enhances comfort on skin contact
- Very light 4-way stretch knit mesh: 95% polyester, 5% spandex
- 90 g/m², 2.9 oz/yd²

® Louis Garneau

DRYTEX® 2004

- Lightweight knit with the natural look and feel of cotton and all the technical properties of polyester
- Odor-free properties enhanced by an antibacterial treatment
- 4-way stretch knit: 94% polyester, 6% spandex
- 180 g/m², 5.3 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

DRYTEX® THERMAL

- Stretch diamond terry jacquard
- Brushed inner face with a grid construction that provides airflow and thermoregulation
- Its wicking finish enhances moisture wicking for maximum comfort
- This fabric has a UPF/SPF 50
- 4-way mechanical stretch knit: 92% polyester, 8% spandex
- 210 g/m², 6.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

NEW

DRYTEX® THERMAL climate

- Stretch diamond terry jacquard with DWR treatment for extra climate protection
- Brushed inner face with a grid construction that provides airflow and thermoregulation
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 92% polyester, 8% spandex
- 210 g/m², 6.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surface

EVA

- Waterproof EVA resin membrane provides maximum protection from the elements
- Contains neither cadmium nor lead, unlike PVC, making its production and use more user- and eco-friendly
- Membrane: 100% ethylene vinyl acetate

Extenz

- Light 2.5-ply fabric
- Its 20-denier stretchable construction allows lightness and ease of movement
- Its polyurethane membrane and water-repellent treatment provide waterproof and windproof properties
- DWR (Durable Water Repellent) finish protects from the elements
- 4-way mechanical stretch knit: 100% polyester
- Membrane: 100% printed polyurethane
- 90 g/m², 2.6 oz/yd²
- Very good impermeability: 10,000 mm
- Very good breathability: 10,000 g/m²/24 h

Extenz 3L

- 3-ply fabric constructed by combining 30-denier and 20-denier knits to offer lightness and protection from the elements
- DWR (Durable Water Repellent) finish on fabric surface
- Made with a breathable polyurethane membrane that allows for moisture wicking and protection from the elements thanks to its waterproof and windproof properties
- Merging of two fabrics for greater stretchability
- Mechanical stretch knit: 100% polyester
- Membrane: 100% polyurethane
- 160 g/m², 4.7 oz/yd²
- Very good impermeability: 10,000 mm
- Very good breathability: 10,000 g/m²/24 h

FENCE3L

- 3-ply hard-shell 40-denier fine gauge allowing softness, lightness and great ease of movement to the fabric as well as an excellent protection from the elements
- DWR (Durable Water Repellent) treatment on the fabric surface allows water to pearl
- Mechanical stretch weave: 100% nylon
- Membrane: 100% polyurethane
- Knit backing: 100% polyester
- 120 g/m², 3.5 oz/yd²
- Very good impermeability: 20,000 mm
- Very good breathability: 20,000 g/m²/24 h

HEATMAXX

- Opaque construction with a brushed back to improve body heat retention
- This fabric has a UPF/SPF 50
- Improvement: Addition of a DRW (Durable Water Repellent) finish for improved protection from the elements*
- 4-way stretch knit: 86% nylon, 14% spandex
- 250 g/m², 7.4 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

* Some finished goods may have a DWR finish. Please refer to style description.

IceTek / icefil

- The surface is treated with Icefil, a xylitol-based treatment that absorbs body heat and transforms sweat into a cooling agent
- Fine-gauged construction results in an opaque, ultra light fabric
- Excellent stretchability thanks to the use of spandex
- Very light and soft to increase comfort
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 92% polyester, 8% spandex
- 144 g/m², 4.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

LIGHT microAIRDRY®

- Made of small inner honeycombs to increase airflow and wick moisture
- This fabric has a UPF/SPF 30
- Mechanical stretch knit: 100% polyester microfiber
- 140 g/m², 4.1 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

® Louis Garneau

Light Wind Pro® POLARTEC®

- This fleece spans an incredibly wide range of conditions; it performs as both outerwear and insulation and offers exceptional durability
- Proprietary yarns and a very tight construction greatly reduce the effects of windchill
- Blocks the wind four times more than traditional fleece
- The Durable Water Repellent outer surface sheds rain and snow
- Brushed inner surface efficiently traps air and provides a high warmth-to-weight ratio
- Inner and outer surfaces are finished for maximum durability and pill-free performance. They retain their insulating ability and original appearance after repeated use and laundering
- Because it is not a laminate, Polartec® Wind Pro® is highly breathable, maintaining 85% of the breathability of traditional fleece to help prevent overheating
- This fabric has a UPF/SPF 50+
- 4-way stretch knit: 58% nylon, 27% polyester, 15% spandex
- 214 g/m², 6.3 oz/yd²

Lightsens

- Stretchable fabric with a polyester multi-filament construction contributing to its softness and comfort
- The use of spandex maintains good stretchability and shape recovery
- Very light 4-way stretch knit: 89% polyester, 11% spandex
- 130 g/m², 3.8 oz/yd²

MATRIX 2.0

- Fabric specifically constructed with different knit zones to combine breathability with protection
- High-precision knitting allows a product both thin and very stretchable
- This fabric has a UPF/SPF 50
- 4-way stretch knit : 77% nylon, 13% polyester, 10% spandex
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

NEW

Mistral

- Nylon spandex multi-function double weave softshell offering breathability, wind and abrasion resistance, quick drying and great ease of movement
- Non-fluorinated DWR (Durable Water Repellent) finish provides efficient protection from water
- 4-way stretch weave: 95% nylon, 5% spandex
- 287 g/m², 8.5 oz/yd²

OXLEY

- 600D oxford construction offers the highest resistance to abrasion for maximum protection in strategic places
- Polyurethane membrane that offers good proctection against the elements
- DWR (Durable Water Repellent) finish provides efficient protection from water
- 2-way mechanical stretch weave: 100% polyester
- Membrane: 100% polyurethane
- 600 g/m², 17.7 oz/yd²
- Good impermeability: 5,000 mm
- Very good breathability: 15,000 g/m²/24 h

POWER + LYCRA® FIBER

- This product contains more LYCRA® fiber than basic fabrics for full stretchability and shape recovery
- Compressive properties maximize muscular performance
- Helps favor blood circulation in the muscles which, during long rides, contributes to better performance and helps increase resistance to fatigue
- Absorbs and wicks moisture
- Power + LYCRA® fiber clothing is designed to fit muscle shape and provide maximum support to muscular fiber - Powered by LYCRA® SPORT ENERGY fabric
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 80% nylon, 20% LYCRA® fiber - Powered by LYCRA® SPORT ENERGY fabric
- 267 g/m², 7.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

POWER MESH

- Opaque mesh construction provides extreme breathability
- Incomparable comfort and flexibility thanks to its spandex content that reduces chafing
- Dries very quickly
- 4-way stretch knit: 80% polyester, 20% spandex
- 177 g/m², 5.2 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Quantum

- Embossed matte nylon spandex knit
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 72% nylon, 28% spandex
- 230 g/m², 6.8 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Signature MAT

- High performance spandex
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 83% nylon, 17% spandex
- 220 g/m², 6.5 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Square Mesh

- Grid-like mesh that provides ventilation, stretchability and quick drying
- 4-way stretch knit: 91% polyester, 9% spandex
- 130 g/m², 3.8 oz/yd²

SUPRAFILO2

- Perforated mesh construction increases airflow and provides great moisture management properties
- Very light and soft for greater comfort
- Spandex content provides stretchability for comfort and ease of movement
- Light 2-way stretch knit: 95% polyester, 5% spandex
- 100 g/m², 2.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

Supra WindDry

- 3-ply softshell resulting from a combination of two knits for optimal elasticity that improves fit and comfort
- Its micro-perforated polyurethane membrane enhances moisture evacuation and protection from the elements
- DWR (Durable Water Repellent) treatment on the fabric surface allows water to pearl
- 4-way stretch 3-ply knit: 83% polyester, 9% polyurethane, 8% spandex
- 323 g/m², 9.5 oz/yd²
- Very good impermeability: 10,000 mm
- Very good breathability: 10,000 g/m²/24 h

SUPER LITE Dry

- 2-ply fabric protects from the elements
- Made of a polyurethane membrane that enhances protection from the elements thanks to water-repellent and wind-breaking properties
- Mechanical stretch 2-ply laminated knit: 100% polyester
- Membrane: 100% polyurethane
- 115 g/m², 3.4 oz/yd²
- Very good impermeability

THERMASOFT 180

- Brushed knit that covers a variety of climate conditions
- Its spandex content ensures freedom of movement
- A hydrophobic treatment allows moisture to evacuate rapidly
- The brushed interior efficiently retains air and offers a high warmth-to-weight ratio
- The fabric retains its insulating ability and original appearance after repeated use and laundering
- This fabric has a UPF/SPF 50
- 4-way stretch knit: 83 % polyester, 17 % spandex
- 180 g/m², 5.3 oz/y²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

VERTEXX

- Opaque construction with a brushed back to improve body heat retention
- This fabric has a UPF/SPF 50
- Improvement: Addition of a DRW (Durable Water Repellent) finish for improved protection from the elements*
- 4-way stretch knit: 90% polyester, 10% spandex
- 200 g/m², 5.9 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

* Some finished goods may have a DWR finish. Please refer to style description.

X-LITE 19

- Extremely light and breathable windbreaking fabric specifically designed to be the lightest and smallest when compacted
- Its 10 by 10 denier ripstop construction optimizes its lightness and resistance to abrasion
- DWR (Durable Water Repellent) waxed finish protects from the elements
- Featherweight weave: 100% nylon
- 19 g/m², 0.5 oz/yd²

WindDry

- 3-ply knit protects from the elements
- Combination of two supple and soft-to-the-touch knits for better comfort on skin
- DWR (Durable Water Repellent) finish on the front provides efficient protection against water
- Finish on the back that enhances moisture management properties
- Micro-perforated polyurethane membrane allows a good protection against the elements because of its water repellent and windproof properties without compromising its excellent breathability
- Merged knit: 100% polyester
- Membrane: 100% polyurethane
- 313 g/m², 9.2 oz/yd²
- Very good breathability: 12,000 g/m²/24 h
- Very good waterproof quality: 10,000 mm

SLIM FIT

Close-fitting garment designed to provide aerodynamics in a cycling position.

For a less compressive feel on the body, upsize.

STANDARD FIT

Garment that provides a close to the body fit without compressing.

RELAXED FIT

Roomier fit that provides a casual look and good range of movement.

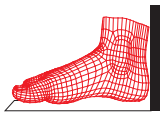
S/M	5-8	35-40
L/XL	8-12	40-44

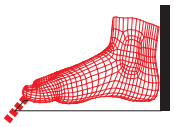
HOW TO FIND YOUR SHOE SIZE

1



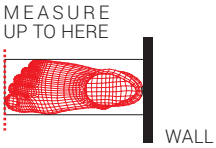
Place a sheet of paper on a flat surface against a wall and align your heel to the edge the wall.

2



Trace a line at the end of your toes.

3



Take the measure from your longest toe. Make sure to measure both feet. The measure of the longest foot is the size to use.

SIZING CHART				MEASUREMENT OF YOUR FOOT
LG (EURO)	US MEN	US WOMEN	UK	CM
34	3	5	2	22.1
35	3.5	5.5	2.5	22.4

49	13	-	12	29.9
50	13.5	-	12.5	30.2

The Garneau Standard Fit is C. If your foot is larger than standard (D fit and over), we recommend choosing a half-size larger than the size suggested on the chart.

If you are purchasing shoes to wear mainly in fall/winter with thicker socks, we recommend measuring your feet with the socks you'll be wearing with the shoes.

SHOES

RACER FIT
Close to the foot for increased sensation and power transfer.

STANDARD FIT
Great performance without compromising comfort.
